

Intermediate Algebra with P.O.W.E.R. Learning, 2e

Messersmith, Vega-Rhodes, and Feldman

Hardcover/©2018

ISBN: 9781259610240/ 1259610241

List of Changes:

- Approximately 1,000 new algorithmic exercises total across all 3 new titles being developed for Connect Math Hosted by ALEKS (CHBA).
- Nearly 800 new online lecture videos being made for the eBook (in both CHBA and ALEKS) across all 3 new titles, all of which are created by the authors themselves. These videos cover all Learning Objectives in the main print books/eBooks.
- A brand-new print supplement across all 3 new titles, the Integrated & Video Study Guide Workbooks, designed to be used in conjunction with the new online lecture videos described above—there is a separate video guide for each new video. See page xi of the attached PDF for a more detailed description of this new feature, and note that we will also be making practice exercises from these video guides assignable within the picker in CHBA.
- A new online-only chapter—Chapter 13: Sequences and Series—in the Intermediate Algebra book.
- A new online-only chapter—Chapter 11: Transition to Algebra—in the Prealgebra book.
- A new recurring feature in the print book/eBook of the Prealgebra book called “Get Ready” exercises. These are exercises explicitly labeled with the “Get Ready” tag that are being added at the beginning of particular exercise sets, so as to allow students to review prerequisite skills that are crucial to know before they can successfully master the subsequent problems in that exercise set.
