

## Creating Question Bank Assignments: Select Content (Classic Experience)

Video Walkthrough: [CLICK TO VIEW](#)

### Begin Building Assignments

Review your course goals. Connect content should be selected to align with these goals. Starting on your Connect section home page, click the **Assignments** tab, and then click **Add assignment** for assignment options.

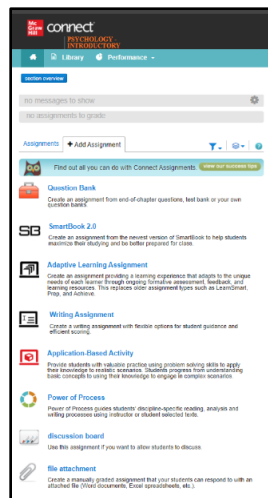

### Assignment Types

Question Bank assignments allow you to select individual questions to assign in the form of homework, practice, quiz, or exam.

SmartBook 2.0 is an adaptive learning solution that provides personalized learning to individual student needs, continually adapting to pinpoint knowledge gaps and focus learning on concepts requiring additional study.

You may see additional assignable content based on your discipline

### Creating Question Bank Assignments

There are several options for creating a Question Bank assignment. First, select the appropriate chapter. Next, select the source within that chapter.

### Preview and Select Questions

In the list of available questions, click the title to see a full preview. Navigate through available questions by clicking the blue arrows above the questions. Click **Add this Question** to add desired questions.

Adding individual questions means every student will receive this question or add multiple questions to a pool to randomize the assignment for each student.

### Add Multiple Questions

You may also add questions from the list view by checking the boxes to the right of each selected question. Then click on **Add (x) Checked Questions**, available at the top and bottom of the question bank.

### Changing The Source

If you want to select content from a different source, click **Select a Different Question Source**. You may choose content from the same chapter or click **Return to Table of Contents**.

### Organize Assignment

Once you have selected your content, click **Organize Assignment**. Point values can be adjusted individually, or click **Set All Point Values** to adjust for all questions.

### Drag and Drop Questions

Grabbing the bar to the left of the question header allows you to reorder an assignment. You may also delete questions.

### Use Consistent Naming

Use a consistent naming convention to ensure easy navigation for your students.

Once you have entered the assignment name, click anywhere outside the box to save, and click **Continue** to move on to policy settings.
