Receiving Your Shipment

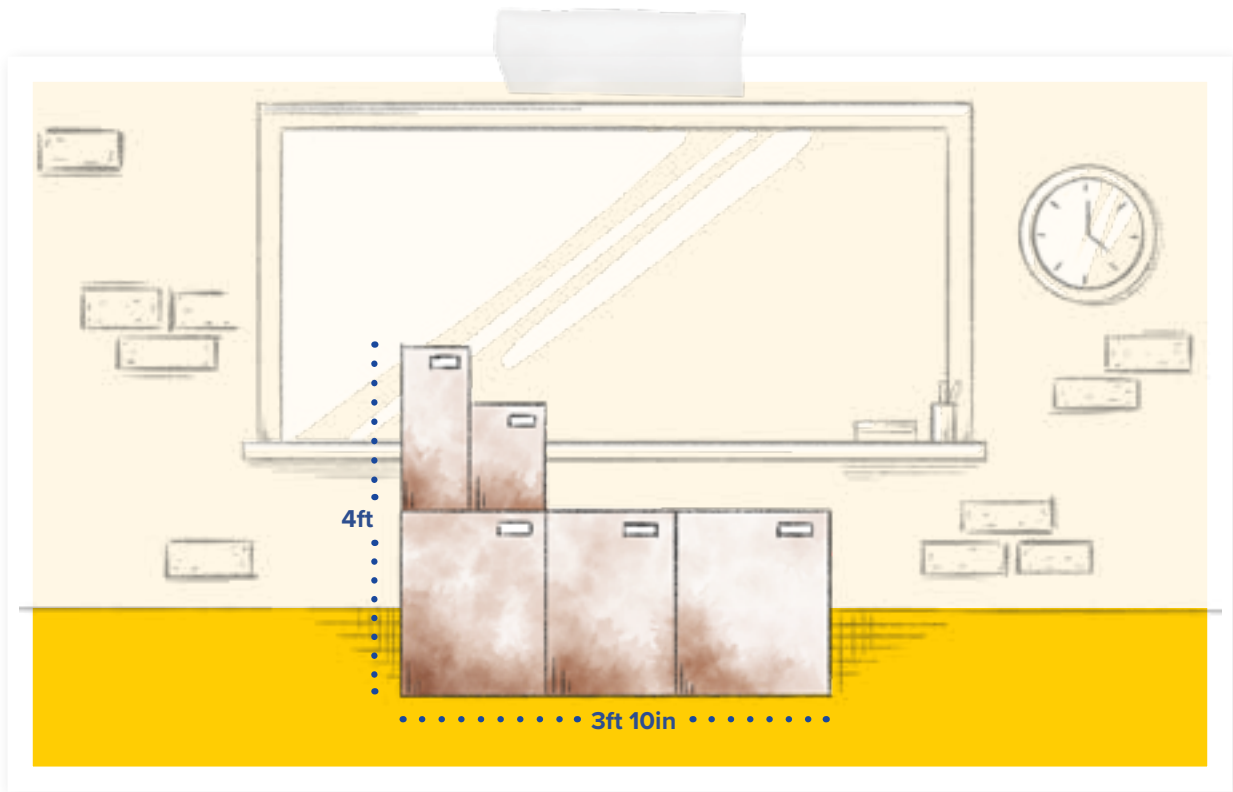

What to expect

When your shipment arrives, each kit will be packaged in boxes organized on pallets. Depending on the size of the order, they may arrive on a semi-truck, or for smaller orders, in a regular-sized vehicle. The volume of materials will depend on the grade level and type of kit that was ordered.

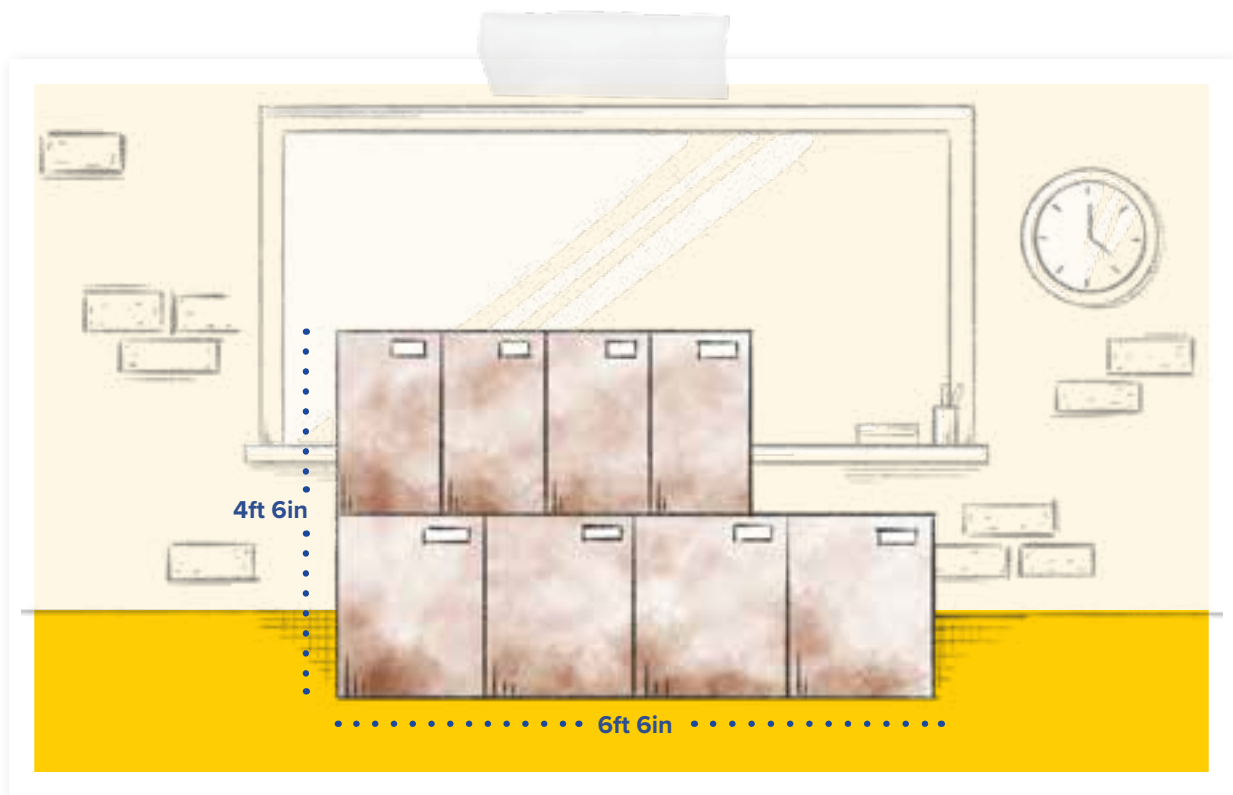

If you have questions or would like shipping box dimensions for a specific Collaboration Kit, please contact your sales representative.

Start Here!

Identify the format of your kit

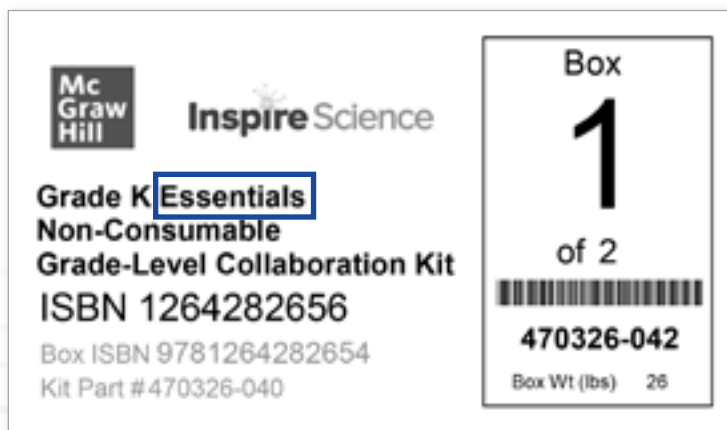

Inspire Science Collaboration Kits come in two formats: **Unitized** and **Grade-Based**. Consult the shipping labels to determine which type of kit your school or district has purchased.

Option 1: Unitized Kits

The word **“Unit”** indicates that you have ordered Unitized Kits. See the next page (page 5) for more information.

Option 2: Grade-Based Kits

The words **“Essentials”** or **“Elaborate”** indicate that you have ordered Grade-Based Kits. Turn to page 6 for more information.

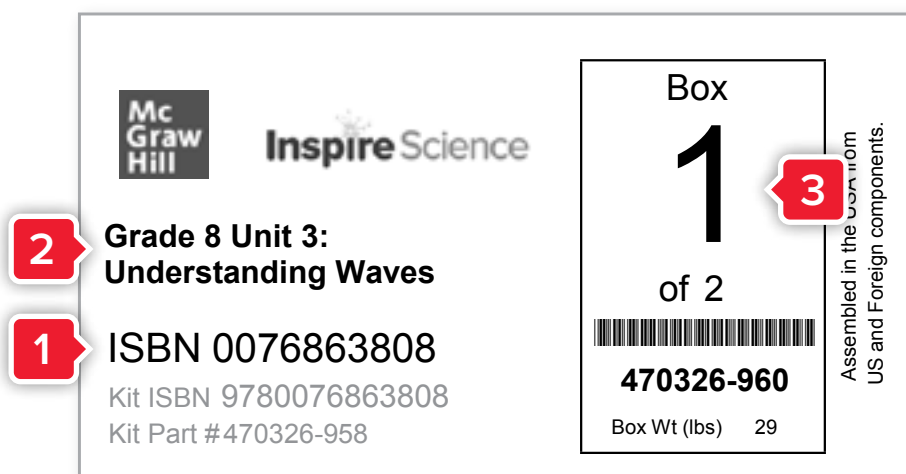

Unitized Kits: The Basics

The basics of the Unitized Collaboration Kits

Each grade level has its own unique kit organized into four units. Each unit consists of one or more boxes. Multi-Year Unitized Kits include **an additional refill for each unit**. When organizing your shipment, please make note of these additional boxes.

Example: Grade 8 Unitized Kits

| | | |
|--------|--|---------|
| Unit 1 | Change Over Time | 1 Box |
| Unit 2 | Energy and Motion | 2 Boxes |
| Unit 3 | Understanding Waves | 2 Boxes |
| Unit 4 | Humans and Their Place in the Universe | 1 Box |

1. The **bold ISBN** on the label is the reference number for that box. The **Kit ISBN** serves as the reference number for all boxes in the unit. Have both numbers ready if you need to contact customer service.
2. The **title of the label** tells you the grade level or discipline and unit.
3. **Some units consist of multiple boxes.** Check to make sure that you have all the materials for the unit.

Use the shipping label on the outside of each box to organize kits by grade level and unit number so that you can easily distribute boxes to the appropriate teachers. **To continue exploring your new Collaboration Kit, skip to page 8.**

Grade-Based Kits: The Basics

The basics of Grade-Based Collaboration Kits

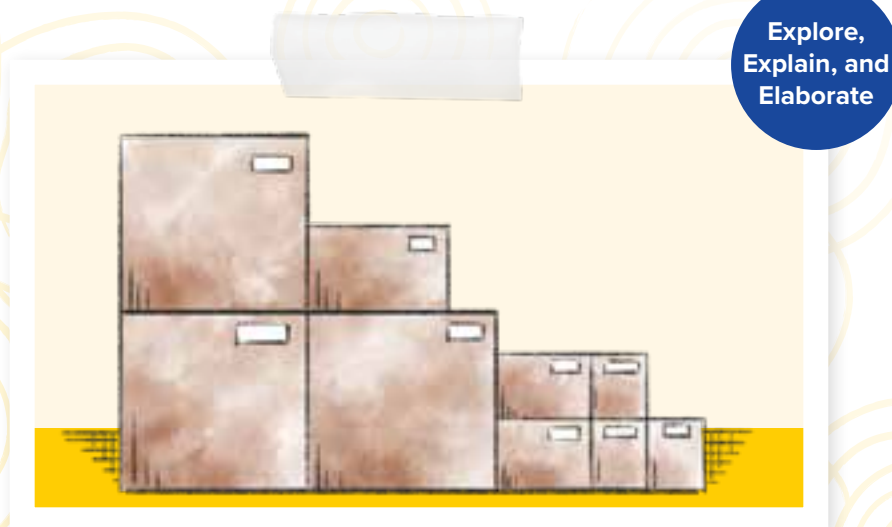

For Grade-Based, Essentials, and Essentials Plus, each grade level has its own unique kit. These kits include a combination of boxes labeled Consumable and Non-Consumable to be used for specific activities. Consumable materials (e.g., soil, food coloring, or sandpaper) are used and disposed of after the activity. If you purchased a multi-year subscription, these are the items that will be refilled. Non-Consumable items (e.g., thermometers) are reused from year to year.

Here is an example of what a fifth grade teacher would receive for each version of the Grade-Based Kits.

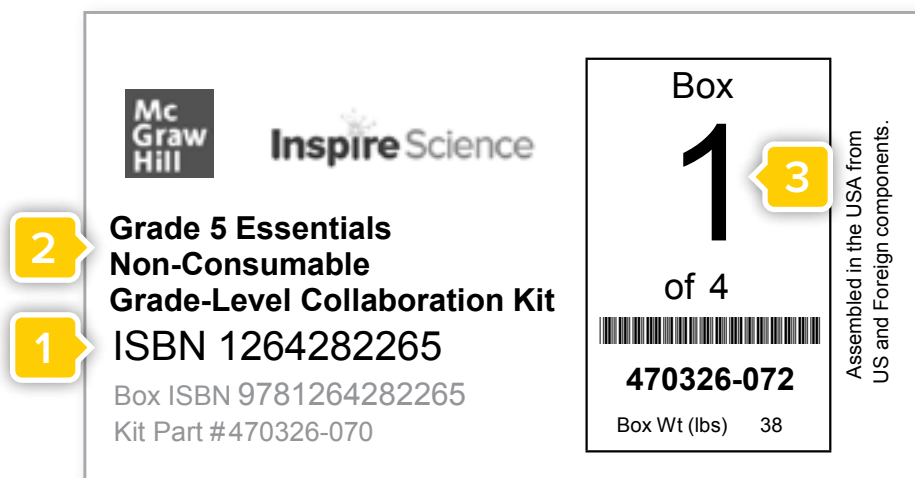

Essentials Kit

Essentials Plus Kit

The labels on each shipping box will help you locate and sort the materials for each grade level. Notice the following information featured on the label.

1. The **bold ISBN** on the label is the reference number for that box. The **Kit ISBN** is the reference number for all boxes in the bundle. Have both numbers ready if you need to contact customer service.
2. The **title of the label** indicates the grade level.
3. **Some units consist of multiple boxes.** Check to make sure that you have all the materials for the unit.

Use the shipping label on the outside of each box to organize kits by grade level and unit number so that you can easily distribute boxes to the appropriate teachers.

Inside the Box

Inside Box 1 of each kit, you'll find a list of materials and other helpful information

Collaboration Kit
Grade 8 Unit 3: Understanding Waves ISBN: 9780076863808

| Box | Bin | Module | Item Description | Kit Qty |
|-----|-----|------------------------------|--------------------------------|---------|
| 1 | 1 | Common Materials | Beakers, glass, 600 mL, pkg/6 | 1 |
| 1 | 1 | Common Materials | Flashlight | 5 |
| 1 | 1 | Common Materials | | 5 |
| 1 | 1 | Common Materials | | 5 |
| 1 | 2 | Information Technologies | Camera | 5 |
| 1 | 2 | Earth & Its Changing Systems | Dominos, set | 10 |
| 1 | 2 | Information Technologies | Rubber Stopper, size E, 1 hole | 5 |
| 1 | 2 | Information Technologies | Thermometer, digital | 5 |
| 1 | 2 | Introduction to Waves | Beaker, glass, 250 mL | 5 |

1. This number is the same as the **Kit ISBN** on the shipping label. If you have an issue with your kit, call **McGraw Hill Customer Service (1-800-338-3987)** and reference this number.
2. The **box column** refers to the shipping boxes. The **bin column** refers to the plastic bins stored inside of the shipping boxes.
3. **Common materials** are items used in more than one module.
4. **Large or heavy items** are not shipped or stored in bins. They will be packed directly inside a shipping box. You can identify these items on the packing list because they will only have a box number.
