----------------------------------	---------	------------	---------------

To accommodate different implementations of the program, course numbers rather than grade levels are referenced on the covers of McGraw-Hill *Illustrative Mathematics* materials. However, grade levels are referenced within the materials, as this is how *Illustrative Mathematics* was originally written.

Course 1 = Grade 6, Course 2 = Grade 7, Course 3 = Grade 8

For professional learning and free material requests, please contact your local McGraw-Hill sales representative.
