

The Literacy Intervention Solution

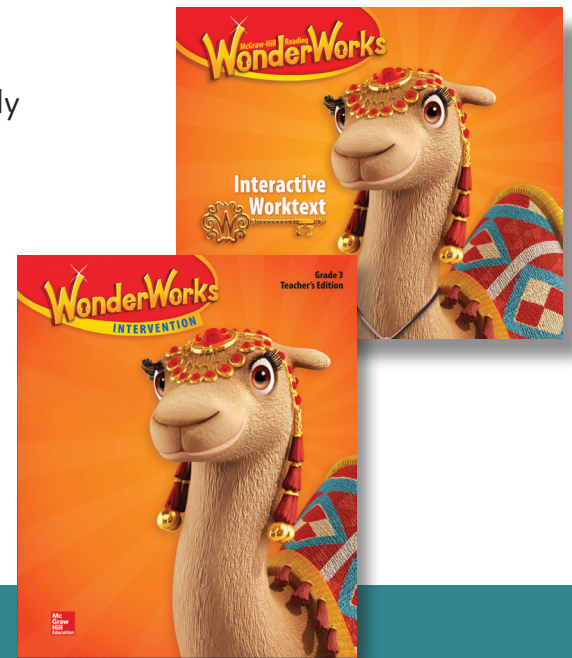

Develop Stronger Readers and Writers with:

- Flexible options for intervention
- Research-based instruction
- Rapid acceleration of students back to grade-level standards

What Is WonderWorks?

WonderWorks is a flexible intervention program that can be easily incorporated into your current ELA curriculum. Grounded in research, *WonderWorks* drives student achievement by:

- Building strong foundational skills
- Developing close reading skills
- Differentiating instruction with scaffolded support
- Engaging students digitally
- Informing instruction through assessment

The research-based instruction provides intensive, scaffolded support for:

- Reading increasingly complex text.
- Thinking critically.
- Applying the rigorous standards.

Build Strong Foundational Skills

WonderWorks uses research-based instruction that includes a teacher modeling approach that moves to guided practice, and ultimately leads students to become independent readers.

Grades K and 1 are focused intensively on foundational skills, which are crucial for developing proficient readers. The explicit, systematic instruction focuses on phonological awareness, phonemic awareness, phonics, word recognition and automaticity, oral vocabulary, and fluency, including important precursor skills.

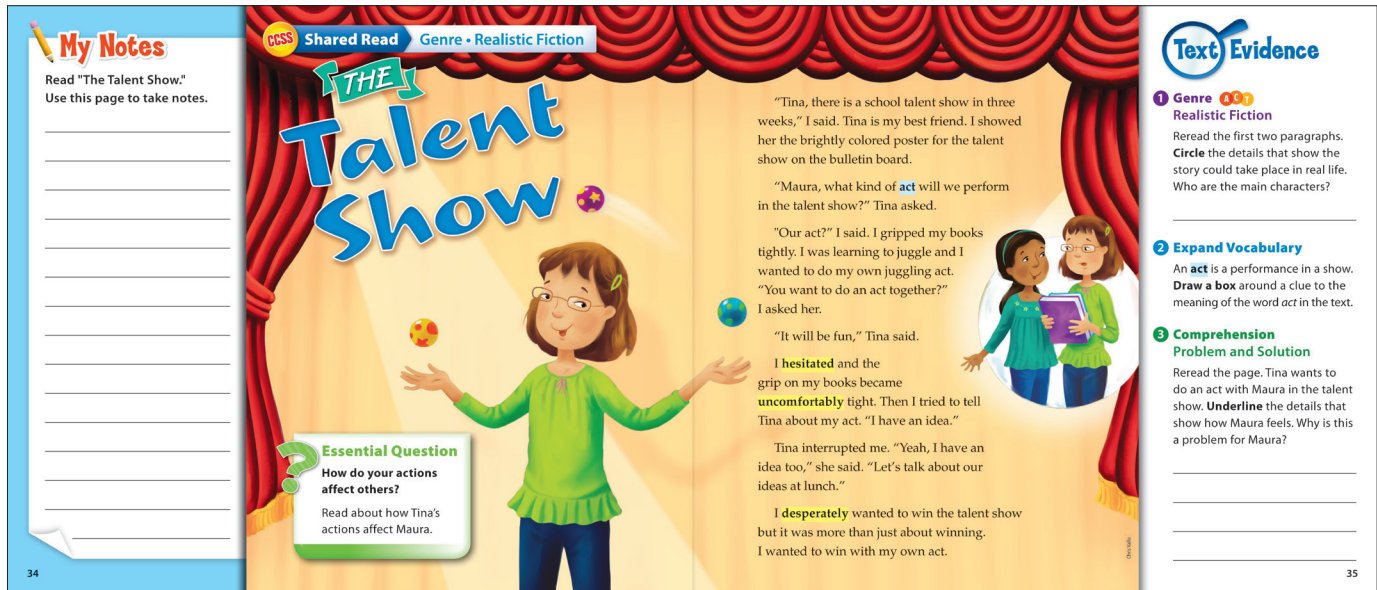

Grades 2-3 and 4-6 Foundational Skills Kits provide explicit and differentiated instruction of key foundational skills.

The Adaptive Learning system provides personalized digital instruction and practice in foundational skills, allowing students to work at their own pace and instructional level.

Develop Close Reading Skills

The Interactive Worktext for grades 2-6 allows students to interact with complex texts through close reading by taking notes, marking text evidence, and writing responses in their own print or eBook version.

Interactive Worktext

Differentiate Instruction with Scaffolded Support

WonderWorks offers leveled readers that provide both literary and informational text. With consistent application of scaffolded instruction, students "Level Up" from the Apprentice level to the Approaching level.

Apprentice

Approaching

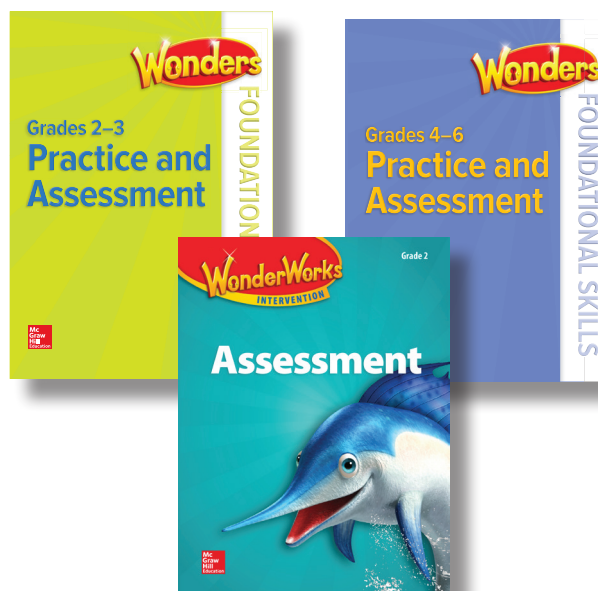

Engage Students Digitally

Technology is a lifeline for students. *WonderWorks* provides interactive resources such as eBooks, online assessments, games, and Adaptive Learning for personalized instruction.

Inform Instruction Through Assessments

You can monitor student progress and inform instruction through assessment. Exit Tests are available to assist teachers in deciding when students are ready to exit the *WonderWorks* intervention program.

- Placement and Diagnostic Assessment
- Weekly Assessment (grades 1-6)
- Mid-Unit Assessment (grades 1-6)
- Unit Assessment (grades K-6)
- Fluency Assessment (grades K-6)
- Foundational Skills Assessment (grades 2-6)
- Exit Test (grades K-6)
