

The New *StudySync*®: Built on a Foundation of Success

In April 2018, EdReports, a widely respected independent K–12 curriculum review organization, evaluated *StudySync* ©2017 and rated it highly with all green scores across all three gateways: Text Quality and Complexity, Building Knowledge, and Usability. We applied feedback from EdReports, renowned program authors, as well as customers from around the country toward an immediate update of the program—*StudySync* ©2021.

StudySync ©2021 applies the same strong instructional principles that EdReports identified in their review of the previous program. In addition, the new curriculum includes new, engaging texts that reflect the diversity of students and their communities. With a wider range of print options, it can be used in any classroom environment. Improvements to student data tracking embedded in *StudySync* Assess allow teachers to follow student progress by every ELA standard and skill.

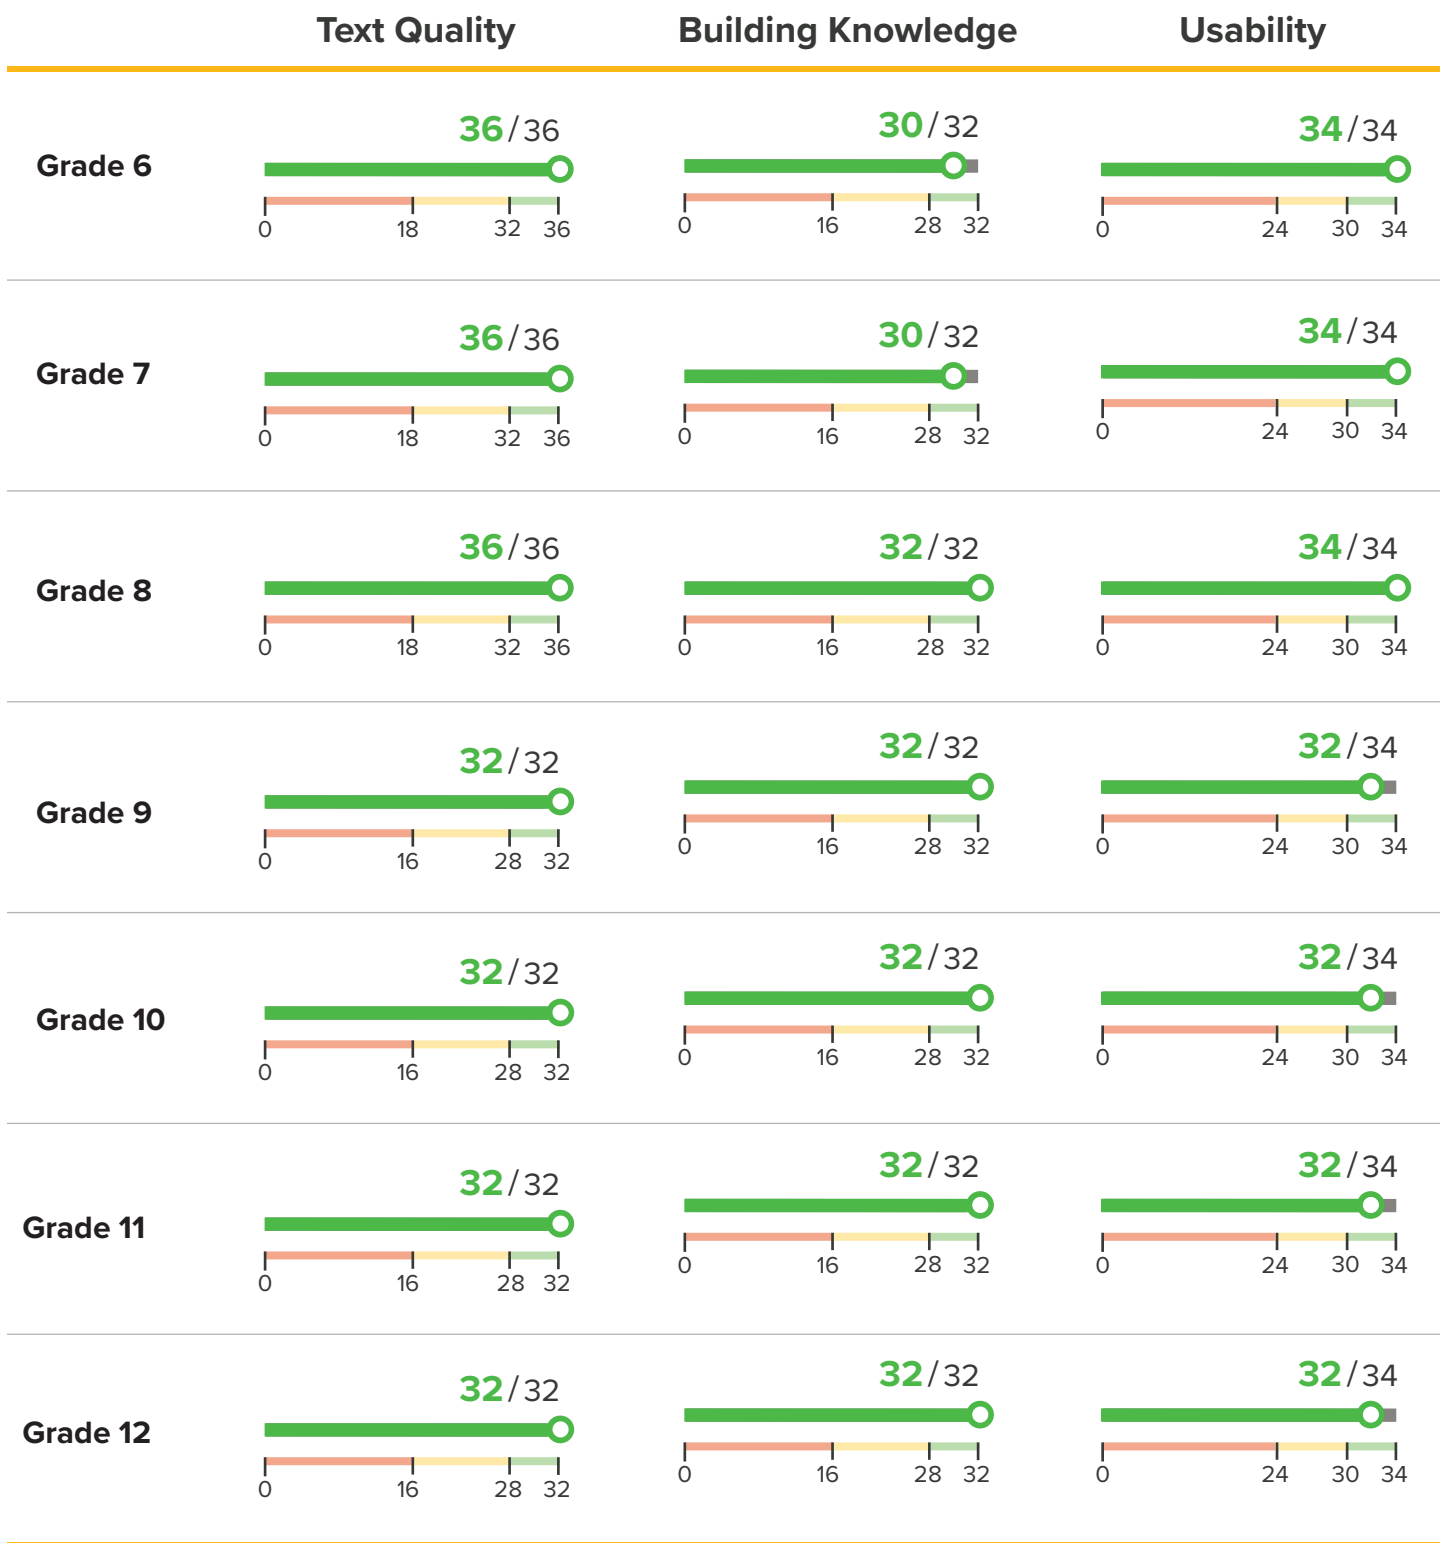

StudySync ©2021 was built on the foundation of the highly rated ©2017 program, so you can be confident that the updated program will deliver the same great success.
