Work with numbers 11–19 to gain foundations for place value.

1. Compose and decompose numbers from 11 to 19 into ten ones and some further ones, e.g., by using objects or drawings, and record each composition or decomposition by a drawing or equation (e.g., $18 = 10 + 8$); understand that these numbers are composed of ten ones and one, two, three, four, five, six, seven, eight, or nine ones.

Measurement and Data (K.MD)

Describe and compare measurable attributes.

1. Describe measurable attributes of objects, such as length or weight. Describe several measurable attributes of a single object.
This standard is first addressed in **Lesson 112**.

Measurement and Data (K.MD)

Describe and compare measurable attributes.

2. Directly compare two objects with a measurable attribute in common to see which object has “more of”/“less of” that attribute, and describe the difference. For example, directly compare the heights of two children and describe one child as taller/shorter.
This standard is first addressed in **Lesson 97**.

Measurement and Data (K.MD)

Classify objects and count the number of objects in each category.

3. Classify objects into given categories; count the number of objects in each category and sort the categories by count.
This standard is first addressed in **Lesson 116**.

Geometry (K.G)

Identify and describe shapes (squares, circle, triangles, rectangles, hexagons, cubes, cones, cylinders, and spheres).

1. Describe objects in the environment using names of shapes, and describe the relative positions of these objects using terms such as *above*, *below*, *beside*, *in front of*, *behind*, and *next to*.
This standard is first addressed in **Lesson 94**.

Geometry (K.G)

Identify and describe shapes (squares, circle, triangles, rectangles, hexagons, cubes, cones, cylinders, and spheres).

2. Correctly name shapes regardless of their orientations or overall size.
This standard is first addressed in **Lesson 85**.

Geometry (K.G)

Identify and describe shapes (squares, circle, triangles, rectangles, hexagons, cubes, cones, cylinders, and spheres).

3. Identify shapes as two-dimensional (lying in a plane, “flat”) or three-dimensional (“solid”).
This standard is first addressed in **Lesson 116**.

Geometry (K.G)

Analyze, compare, create, and compose shapes.

4. Analyze and compare two- and three-dimensional shapes, in different sizes and orientations, using informal language to describe their similarities, differences, parts (e.g., number of sides and vertices/“corners”) and other attributes (e.g., having sides of equal length).
This standard is first addressed in **Lesson 94**.

Geometry (K.G)

Analyze, compare, create, and compose shapes.

5. Model shapes in the world by building shapes from components (e.g., sticks and clay balls) and drawing shapes.

This standard is addressed in the following activities of the Student Practice Software:

- **Block 6:** Activity 3
- **Block 6:** Activity 6

Geometry (K.G)

Analyze, compare, create, and compose shapes.

6. Compose simple shapes to form larger shapes. For example, “Can you join these two triangles with full sides touching to make a rectangle?”

This standard is addressed in the following activity of the Student Practice Software:

- **Block 6:** Activity 3

Count to tell the number of objects.

4. Understand the relationship between numbers and quantities; connect counting to cardinality.
- When counting objects, say the number names in the standard order, pairing each object with one and only one number name and each number name with one and only one object.
 - Understand that the last number name said tells the number of objects counted. The number of objects is the same regardless of their arrangement or the order in which they were counted.
 - Understand that each successive number name refers to a quantity that is one larger.
