

Features of the 2005 Edition

The 2005 edition of *Corrective Mathematics* contains significant improvements over earlier editions.

- Scripting in the Teacher Presentation Books has been revised to the newer Direct Instruction styles, making lessons easier to use.
- New design features allow you to preview, present, and review lessons more efficiently.
- Fact Practice Blackline Masters have been added to the *Addition*, *Subtraction*, *Multiplication*, and *Division* modules, to help students become fluent with math facts.
- Reproducible Cumulative Review Worksheets in *Subtraction*, *Multiplication*, and *Division* modules boost student proficiency of previously learned operations.

New Software

The new software program, ExamView® for *Corrective Mathematics*, provides dynamic worksheets for each module of *Corrective Mathematics*, and let's you create your own paper or computer-based tests and worksheets.
