(a) Introduction.	<p>I. SOCIAL AND EMOTIONAL DEVELOPMENT DOMAIN. While a preschool education should include activities that strengthen cognitive skills, it must provide for the development of the social and emotional competencies required for school readiness. The vast majority of social/emotional development occurs with little or no formal instruction but with appropriate teacher guidance surrounding social and emotional situations such as separating from families, sharing space and materials with peers, resolving conflicts, and developing empathy for others. The development of these personal and social skills enables children to build a sense of who they are and what they can do. Children establish positive relationships with teachers and peers which enable them to participate effectively in the classroom community, assert independence in appropriate ways, and accomplish tasks that are meaningful to them without infringing on the rights of others.</p> <p>II. LANGUAGE AND COMMUNICATION DOMAIN. During the prekindergarten years, children's experiences with language begin to form the basis for their later school success. Explaining words and sounds, talking to children about objects and their names (labeling), and using expanded vocabulary are all ways in which teachers can help to build children's oral language skills. Given adequate opportunities to interact with responsive adults in language rich classrooms, young children's language skills usually expand rapidly during these years. For children whose first language is other than English, the native language serves as the foundation for communication among family and community members, and building concepts and understanding of the world around them. This proficiency also assists in English language acquisition. Many children who are English language learners (ELL) enter our schools with a remarkable knowledge of their native language, a "linguistic knowing" that they utilize instinctively in their daily communications.</p> <p>The process of transfer (with literacy-based ESL and oral language beginning in prekindergarten, requires that we take what students already know and understand about literacy in their home language and ensure that this knowledge is used to help them gain literacy skills in a second language. The language skills include listening and speaking, expanding both children's understanding of what they hear, as well as their ability to communicate their own ideas and experiences. These language skills in turn have a tremendous impact upon reading and writing as children progress through school. Language is optimally supported by providing a large amount of time throughout the day for oral language communication including time for authentic, purposeful child-initiated oral language opportunities. Prekindergarten educators should provide opportunities to promote language learning in children who speak a language other than English.</p> <p>Children who are English language learners may have difficulties with the pragmatics (the appropriate use of language to communicate effectively in many different situations and for many different purposes) of English. These include rules of politeness, conversational skills, and extended discourse (telling story and giving an explanation). Pragmatic skills are important for children who are English language learners to understand what teachers say in the classroom. Scaffolding is effective for building young children's language and literacy; this is also true for the English Language Learner. Except where specified, the following guidelines outline language accomplishments for 4-year-old children in their native language. The stated outcomes should be used as a guide for children who have limited English proficiency and are appropriate for all children who are English language learners, providing guidance for teachers' instruction. Additional specific guidelines for the support of language development of prekindergarten children whose home language is not English in English-only settings appear below and are indicated by this icon . (LEER MAS, 2001)</p> <p>III. EMERGENT LITERACY: READING DOMAIN. Becoming literate is one of the most important milestones for young children to achieve. According to National Research Council estimates from 1998, if children receive proper exposure and systematic opportunities to develop foundational language, reading, and emergent writing skills during early childhood, as few as five percent may experience serious reading difficulties later. The literacy experiences provided during the prekindergarten year form the basis for learning to read. Children develop the understanding of the everyday functions of print, gain the motivation to want to learn to read and appreciation of different forms of literacy, from nonfiction and fiction books, to poems, songs, and nursery rhymes, by being read to and interacting with stories and print.</p>

	<p>As they watch adults engage in reading and writing activities, they want to be able to read and write as well. When children interact with language in these formats, their ability to respond to and play with the sounds in language increases. This awareness of the sounds in language, or phonological awareness, is one of the key predictors of later reading success. Children develop this awareness that words are made up of sounds which can be put together and taken apart. Recent research has provided new insights into the order in which children acquire this awareness. In the early stages, children are able to detect larger phonological units such as words and syllables. As their awareness deepens, they are able to manipulate the smallest meaningful units of sound. Print awareness and letter knowledge must also be developed through planned, playful activities that engage children in noticing the letters in their names and the names of their classmates.</p>							
	<p>As their language abilities increase, their understanding of what is read aloud to them also increases, as demonstrated through the questions they ask and answer, and their reenacting or retelling of stories. The process of transfer (with literacy-based ESL and oral language beginning in prekindergarten) requires that we take what students already know and understand about literacy in their primary language and ensure that this knowledge is used to help them gain English language and literacy skills. For ELL children difficulties in transfer may appear in syntax, homonyms, inference, cultural nuances, idioms, and figurative language. For students who are learning English, effective second language reading instruction requires an understanding of and is guided by knowledge based on: assessment, cultural responsiveness, gradual release, strategic use of language, and appropriate instruction. (LEER MAS, 2001)</p>							
	<p>This is an important time for 4-year-olds to develop their sense of self and ethnic identity. One strategy to support this development is the use of linguistically and culturally relevant texts whenever possible. Teachers of English language learners can help children understand who they are and where they come from when they connect to children's lives in a meaningful way, given their cultural and linguistic diversity.</p>							
	<p>IV. EMERGENT LITERACY: WRITING DOMAIN. Prekindergarten-age children generate hypotheses about how written language works and begin to explore the uses of writing for themselves. They also begin to ask adults to write signs and letters for them. Children love to then imitate these adults by writing a letter or writing notes on the refrigerator. This "pretend writing" begins a child's development of skills with the written word. Through these early writing experiences, young children develop initial understandings about the forms, features, and functions of written language. Over time, children's writing attempts more closely approximate conventional writing. Children learn to write through many such experiences.</p>							
	<p>V. MATHEMATICS DOMAIN. Prekindergarten children's mathematical understandings are built on informal knowledge about quantity that they develop even before any instruction. Young children know immediately if someone gets more cookies than they do. They like telling their age, such as by holding up four fingers to tell an adult how old they are. Children typically use quantity during play to know who scored a goal. Teachers can use this early interest in communicating math-related ideas to foster greater mathematical competencies in the preschool environment. Teachers can plan rich environments and offer sequenced opportunities for preschool children to explore math skills. Effectively supporting early mathematical competencies requires creative use of instructional tools, including play, drawing, and computer technology.</p>							
	<p>The core of any early education mathematics curriculum should focus on developing young children's ability to problem solve – developing their capacity to ask thoughtful questions, to recognize problems in their environment, and to use mathematical reasoning with familiar materials in the classroom. Teachers must recognize that early math instruction is not limited to a specific period or time of day in preschool. Instead it is a natural part of any quality preschool learning environment. Teachers enhance children's mathematics learning when they ask questions that provoke clarification, extension, and development of new understanding. For example, as children build with blocks, their teacher can introduce such concepts as higher, lower, in front of, behind, larger, and smaller. During an art project, such as putting buttons on an outline of a person, the teacher might say the person needs five buttons on his shirt. One child may place two buttons and a second child puts on three. During shared reading activities, the teacher might ask, "How many birds do you see on this page?"</p>

Accumulated research evidence indicates that preschoolers are ready to receive instruction that builds on a rich set of informal mathematical skills. Teachers should be sensitive to what is known about individual learner's developmental status and skills. For example, some children may not be ready for oral communication of some mathematical ideas due to delayed speech. Other children may show difficulties with fine motor coordination skills needed to work effectively with manipulatives. Speech-delayed children may be able to learn and express mathematical ideas in ways that reduce demands on oral vocabulary, such as by using concrete materials. These outcomes are provided to help foster a quality mathematics curriculum for preschool children in Texas. The Texas Prekindergarten Guidelines are divided into these skill areas: counting, math symbols, adding and taking away, geometry, measurement, and classification and patterns.								
Due to the high use of language for math instruction, teachers should exhibit patience and accommodation for greater wait time for responses from ELL children. These children often will acquire math vocabulary in both the home language and in English. For this reason, it may be beneficial for children who are learning English to learn new concepts and vocabulary in their home language with math practice conducted in both the children's home language and English.								
VI. SCIENCE DOMAIN.								
VII. SOCIAL STUDIES DOMAIN. Social studies concentrates on the nature of people and their world, the heritage of the past, and contemporary living and culture. Social studies is integral both to young children's lives and is of great interest to them. Driven by a desire to know and achieve mastery over self and their environment, children are eager to gain understanding of the many aspects of their culture and environmental world, beginning with their family, then moving to the world around them. Through social studies, children begin to develop the self-understanding that will serve as a foundation for learning about others and the world. Although, all aspects of education have the goal of preparing children to become contributing members of society, social studies is particularly well suited to foster the skills and attitudes necessary for participation in a democracy. Skills such as problem-solving, decision-making, and working independently, as well as with others in a classroom, prepare children to become fully functioning citizens.								
Prekindergarten children come from a variety of cultural and linguistic settings; therefore, their understanding of the world around them can be unique and very diverse. It is important to realize that children bring different background knowledge to the classroom, and this will undoubtedly influence their understanding of some concepts in the social studies domain. Therefore, it is important to incorporate and honor the child's home, community, and diversity in their understanding and world view.								
VIII. FINE ARTS DOMAIN.								
IX. PHYSICAL DEVELOPMENT DOMAIN. Learning is inextricably tied up in action – simply performing motor skills actually alters brain function. Research documents developmental relationships between perception, action, and cognition in which children's knowledge develops from their actions. Thus, learning relates directly to mobility and motor skills. The motor developmental domain influences many aspects of children's success in cognitive, perceptual, and social development that casual observers might not consider. Movement is at the center of young children's lives. The development of certain motor skills is thought to determine, in part, the emergence of particular perceptual and cognitive abilities. Teachers should encourage children to develop gross and fine motor skills and to stretch the limits of their physical capacity. Physical achievements help children to gain and maintain self-confidence, stability, and even contribute to such activities as holding a pencil or crayon and writing.								
Running, hopping, starting and stopping, changing direction, and catching and throwing are the prerequisites for the games of middle childhood that further advance children's cognitive and social development. The teacher should be a good role model by participating as much as possible with these activities. Vigorously interacting with children not only sets a good example of physical activity, but also results in children's showing signs of improved mental health and emotional status and closer teacher-child relationships. Activities to develop physical skill and refine motor development can be included in early childhood education and development environments through games and group play. Rhythmic, stability, loco-motor, and manipulative skills are important and can be addressed in a number of ways.								
Most importantly, though, these activities should make a meaningful link with social, emotional, and cognitive development. Physical activity not only promotes cognition but also can enhance children's social skills and self-esteem through group participation. Free, unstructured outdoor play as a means of developing gross motor, fine motor and sensory skills is valuable to children's overall well being.

X. TECHNOLOGY APPLICATIONS DOMAIN. Young children have much to gain from the use of technology. In prekindergarten, they expand their ability to acquire information, solve problems, and communicate with others. Regular access and exposure to computers and related technology can enhance this learning. Children use engaging, age-appropriate, and challenging software; and technology to extend their knowledge and to enrich their learning of curriculum content and concepts. These technologies serve as important learning tools and are integrated throughout the instructional program. Providing access to a variety of technologies is critical in the development of 21st century skills that young children need to learn and grow.

(b) Knowledge and Skills.								
I. SOCIAL AND EMOTIONAL DEVELOPMENT DOMAIN	A. Self Concept Skills. Central to understanding emotional development is the idea of self concept—an increasing level of conscious awareness of one's feelings, thoughts, abilities, likes, and dislikes, as well as awareness of one's body in space. Preschool children's emerging ability to perceive these aspects of themselves at a conscious level distinguishes them from toddlers, who lack such awareness. Children begin to generate multiple answers to the question "Who am I?" which is an essential aspect of becoming competent in related areas such as self control and social/friendship skills.	1. 	B. Self Control Skills. Preschool children feel safer and function more successfully in the classroom when rules and routines are consistently followed. A well organized classroom with well prepared activities helps children extend their attention span and build self-control and personal responsibility. As they encounter and overcome new and various social obstacles when playing with peers, guidance from teachers will enable them to learn acceptable and unacceptable ways of dealing with social and emotional stress and/or excitement.	1. 	<p>C. Social Competence Skills. As preschool children enter school they start forming relationships with the adults and other children in their environment. Teachers can help children develop meaningful and rewarding relationships by offering them facilitative support. During this developmental period, children often begin to develop special friendships with particular peers which increase their feelings of comfort, pleasure, and confidence in their social world. These experiences also help build a sense of empathy and caring for others.</p>	<p>1. Child uses positive relationships as modeled by his teacher for her own pro-social behaviors.</p>	>>>>	>>>>	3	9780076582297 9780076582303 9780076582310	49, 61, 85, 199, 231, 255, 295 111, 303, 305 57, 87	<p>Tomar buenas decisiones, Tomar buenas decisiones, Tomar buenas decisiones, Desarrollo social y emocional, Lenguaje y vocabulario oral, Destrezas sociales y emocionales, Lenguaje y vocabulario oral</p> <p>Observar e investigar, Moverse y aprender, Jugar para aprender</p> <p>Centro de libros y audio, Centro de libros y audio</p>

II. LANGUAGE AND COMMUNICATION DOMAIN	A. Listening Comprehension Skills. From birth, children begin learning by listening to the world around them. As their exposure increases, so does their understanding. Prekindergarten-age children are able to comprehend with increasing accuracy what they hear in conversations and in stories read aloud. Children demonstrate understanding through their questions, comments, and actions. According to state law, prekindergarten children who are English language learners can be in a classroom environment that is either English as a Second Language instruction or Bilingual. Children who are English language learners arrive at school with listening comprehension skills in their home language. These skills can be used to support the child's development in English. Children who are English language learners listen purposefully to both English-speaking and Spanish-speaking teachers and peers to gather information about both their home language and their new language (English). (LEER MAS, 2001)	1. Child shows understanding by responding appropriately.	>>>>	>>>>	3	9780076582297	71, 139, 179, 215, 231, 233, 251	Lectura en voz alta, Conciencia fonológica, Lectura en voz alta, Lectura en voz alta, whole page, Centro de fantasía y aprendizaje, Lectura en voz alta

	<p>B. Speaking (Conversation)</p> <p>Skills. Prekindergarten children gain the ability to use language in a variety of settings and for a variety of reasons. They become increasingly able to describe wants and needs, carry on a conversation with others, and share information with both peers and adults. The skill to engage others in conversations involves asking questions, listening, and responding, as well as using verbal and nonverbal expressions. Children who are English language learners may require more time to respond and greater wait time, because they are learning and processing two languages at once. This is a normal part of second language acquisition. Children learning English should be encouraged and expected to demonstrate their speaking/communication skills in their home language as well as in English.</p>	<p>1. Child is able to use language for different purposes.</p>	>>>>	>>>>	3	9780076582303 9780076582310 9780076582334	35, 47, 49, 87, 89 127, 129 117, 211	<p>Whole page, Whole page, Tomar buenas decisiones, whole page, whole page</p> <p>whole page, Centro del ABC</p> <p>Centro de construcción, Lenguaje y vocabulario oral</p>

	C. Speech Production Skills. Young children must learn to vocalize, pronounce, and discriminate among the sounds of the alphabet and words of language. Although most children in prekindergarten can accurately perceive the difference between similar-sounding words, they continue to acquire new sounds and may mispronounce words in their own speech. The ability to produce certain speech sounds such as /s/ and /r/ improves with age. Just as infants and toddlers develop control over the sounds of their first language, young children in ELL settings gradually learn to pronounce the sounds of the English language. 	D. Vocabulary Skills. Children's vocabulary acquisition is largely dependent upon interactions with adults. These may be occurring in one or more languages through talking about experiences, reading familiar stories, singing familiar songs, and playing word games. Prekindergarten children experience rapid growth in their understanding of words and word meanings. Vocabulary knowledge reflects children's previous experiences and growing knowledge of the world around them and is one of the most important predictors of later reading achievement. As children learn through experiences, including play, they develop concepts, acquire new words, and increasingly refine their understanding of words they already know. (continued below)	1. Child uses a wide variety of words to label and describe people, places, things, and actions.	a. 	English language learners may need extensive English vocabulary instruction. Children who are English language learners arrive at prekindergarten with a vocabulary knowledge base in their home language. This knowledge base should be used to develop vocabulary in the child's second language. When introducing vocabulary to children who are English language learners, teachers should use a variety of approaches to teach important new words and use real-life objects or pictures when appropriate.				3

	E. Sentences and Structure Skills. Effective communication requires that children use their knowledge of vocabulary, grammar, and sense of audience to convey meaning. Four-year-olds become increasingly adept at using language to express their needs and interests, to play and pretend, and to share ideas. Children's use of invented words and the over generalization of language rules (for example, saying "foots" instead of "feet" or [Spanish] "yo no cabo" instead of "yo no quepo") is a normal part of language acquisition. Sentence and grammatical complexity develops in young children with plenty of opportunity for rich conversation. It is important that time is spent in authentic speaking opportunities. Also, teachers can support English language development through more specific playful language-building activities. (LEER MAS, 2001)	1. Child typically uses complete sentences of four or more words and grammatical complexity usually with subject, verb, and object order.	a. III. EMERGENT LITERACY: READING DOMAIN	A. Motivation to Read Skills. To ensure that all children enter school ready to learn, early education efforts must encourage emergent literacy. When optimal conditions exist in a child's environment, literacy develops naturally, and one of the goals of early education must be cultivating that optimal environment. Prekindergarten children benefit from classroom activities and environments that create an association between reading and feelings of pleasure and enjoyment, as well as learning and skill development. These early experiences will come to define their assumptions and expectations about becoming literate and influence their motivation to work toward learning to read and write. Children may have difficulty comprehending read alouds or listening to stories without any background support, particularly if they have limited experiences with the concepts included in the story or text. 	B. Phonological Awareness Skills. Phonological awareness is an auditory skill that involves an understanding of the sounds of spoken words. It includes being able to recognize individual words in a spoken sentence, blending and dividing words into syllables, beginning with compound words which, because each syllable has meaning connected to, it is easier for children to work with, adding and taking those meaningful units, recognizing and producing rhyming words, identifying words that sound the same at the beginning, and for some children, blending words at the phoneme or single sound level. Because phonological awareness begins before children have learned a set of letter-sound correspondences, encouraging phonological awareness does not require print. Phonological awareness represents a crucial step toward understanding that letters or groups of letters can represent phonemes or sounds (the alphabetic principle). (continued below)	1. Child separates a normally spoken four-word sentence into individual words.	>>>>	>>>>	3	9780076582297	31, 175, 187, 211, 261, 295	Conciencia fonológica, Conciencia fonológica, Conciencia fonológica, Conciencia fonológica, Conciencia fonológica, Centro de libros y audio, Conciencia fonológica

	This understanding is highly predictive of success in beginning reading. Some basic proficiency in English may be prerequisite to the development of phonological awareness in English for second-language learners; however, a child's home language can help support the development of phonological awareness in English. Research demonstrates that phonological awareness in English and Spanish are highly related; therefore, children in Bilingual/ESL instruction will be taught phonological awareness skills in tandem with their primary language while simultaneously developing English language skills. Working with individual sounds in words is the highest level of phonological awareness. Although some prekindergarten children may be able to work with sounds at this level, it is not appropriate to expect all children to be able to achieve this level of sensitivity to the sounds in language (such as "c" "a" "t" = cat). (continued below)				3

	C. Alphabet Knowledge Skills. Letter knowledge is an essential component of learning to read and write. Young children learn best when information is presented in context and when educators provide opportunities for children to create experiences that make the material meaningful. Rote practice (or the "skill and drill" method) can result in frustration and negative attitudes toward learning. Knowing how letters function in writing and how these letters connect to the sounds children hear in words is crucial to children's success in reading. Combined with phonological awareness, letter knowledge is the key to children understanding the alphabetic principle. Children will use this sound/letter connection to begin to identify printed words, such as their names and other familiar words.	1. 	D. Comprehension of Text Read Aloud Skills. Frequent book reading relates strongly to school readiness: children who are read to on a regular basis have a higher likelihood of acquiring age-appropriate language skills. Exposure to many kinds of books, both fiction and information books, helps prekindergarten children become familiar with the language of books and story forms. Children develop concepts of story structures, character actions, and knowledge about informational text structure which influences how they understand, interpret, and link what they already know to new information. As children become readers, this understanding of how stories work facilitates their reading comprehension which is the end goal of reading. (continued below)	1. Child retells or re-enacts a story after it is read aloud.	a. Child retells a story after it is read aloud.	>>>>	3	9780076582297 9780076582310	179, 187, 191, 203, 227 191, 203, 211, 213, 215, 227	Lectura en voz alta, Lenguaje y vocabulario oral, Lectura en voz alta, Lectura en voz alta, Lectura en voz alta Lectura en voz alta, Lectura en voz alta, Lenguaje y vocabulario oral, Centro de fantasía y aprendizaje, Lectura en voz alta, Lectura en voz alta
	Reading books in English with ELL children will increase their knowledge of English language and vocabulary. In classrooms with children who are learning English, it is also critical that children read literature in their home language, whenever possible. Concepts of story structure, character actions, and informational text can be learned through both home language text as well as English texts.				3

IV. EMERGENT LITERACY: WRITING DOMAIN	A. Motivation to Write Skills. As children watch adults write for many purposes, they develop the understanding that print conveys meaning. Initially, children engage in drawing as a way to communicate. This is the earliest stage of writing. Young children sketch lines and scribble "notes" in an attempt to imitate adults' writing behaviors and begin to make connections between print and spoken words. With this understanding of the function and meaning of print comes the motivation to use print in the same manner. Keep in mind that it is not important what children write but that they write something to convey meaning, in the form of scribbles, letter-like forms, or strings of letters.	1. Child intentionally uses scribbles/writing to convey meaning.	a. 	D. Concepts about Print Skills. Just as children learn to talk by talking, children learn concepts about print through interacting with print. To children, it may appear that writing is simply talk that has been written down. However, there are rules that apply to writing that do not apply to speaking. These specific rules that govern how to record thoughts in writing must be learned so children can become more proficient at conveying their thoughts and actions.	1. Child uses some appropriate writing conventions when writing or giving dictation.	a. Child uses some appropriate writing conventions when writing.	>>>>	3	9780076582297 9780076582303 9780076582327	273, 293, 305 41, 69 41, 177, 197	Centro del escritor, Escritura, Escritura Escritura, Centro del ABC Escritura, Centro del escritor, Escritura

	E. Classification and Patterns Skills. Prekindergarten children sort and classify objects using one or more attributes. They begin to use attributes of objects to duplicate and create patterns. (Typically referred to as algebraic thinking such as described in NCTM focal points.) With formal instruction, they will participate in creating and using real/pictorial graphs.	1. Child sorts objects that are the same and different into groups and uses language to describe how the groups are similar and different.	a. VI. SCIENCE DOMAIN	A. Physical Science Skills. Prekindergarten children learn to explore properties of materials, positions, and motion of objects through investigations which allow them to notice the attributes of each of these. These explorations continue as children use attributes to classify and sort objects, make observations and predictions, problem-solve, compare, and question. Children learn about sources of energy by investigating and discussing light, heat, electricity, and magnetism.	1. Child describes, observes, and investigates properties and characteristics of common objects.	a. VII. SOCIAL STUDIES DOMAIN	A. People, Past and Present Skills. Prekindergarten children are aware of time and begin to organize their lives around it. Four-year-old children learn to depend on events and routines that occur in a regular and predictable order. They begin to understand past events and how these events relate to present and future activities, demonstrating evidence of their growing understanding of time, change, and continuity.	1. (d) The board of trustees of each school district shall provide for the observance of one minute of silence at each school in the district following the recitation of the pledges of allegiance to the United States and Texas flags under Subsection (B). During the one-minute period, each student may, as the student chooses, reflect, pray, meditate, or engage in any other silent activity that is not likely to interfere with or distract another student. Each teacher or other school employee in charge of students during that period shall ensure that each of those students remains silent and does not act in a manner that is likely to interfere with or distract another student.								
VIII. FINE ARTS DOMAIN	A. Art Skills. Children explore a wide variety of materials and make discoveries about color, shape, and texture through art experiences. They learn to express what they know and begin to recognize how others express themselves through art. They also begin to gain control of fine-motor muscles and practice hand-eye coordination.	1. Child uses a variety of art materials and activities for sensory experience and exploration.	a. 	B. Music Skills. Four-year-old children express themselves through singing and movement, and by playing simple instruments. Like art, music is a form of experiencing, learning, and communicating with others. Children learn to experiment with music concepts, volume, tempo, and sound. They begin to appreciate different types of music.	1. Child participates in classroom music activities.	>>>>	>>>>	3	9780076582297 9780076582303 9780076582310	31, 37, 81, 127, 153, 159, 161, 285 159, 161 159	Conciencia fonológica, Observar e investigar, Centro de fantasía y aprendizaje, Conciencia fonológica, Centro de libros y audio, whole page, Centro de fantasía y aprendizaje, Centro de libros y audio whole page, Centro de creatividad Explorar y expresar

	C. Dramatic Expression Skills. Creative drama in prekindergarten involves young children in expressive and spontaneous productions. Children demonstrate their unique interpretation of music, songs, and stories through movement and dramatic experiences. These experiences contribute to children's ability to communicate more effectively and engage in cooperative activity with others.	1. Child creates or recreates stories, moods, or experiences through dramatic representations.	a. IX. PHYSICAL DEVELOPMENT DOMAIN	A. Gross Motor Development Skills. Children explore their physical space and understand how their bodies function in space through active movement experiences. Loco-motor skills are developed first, followed by stability (turning, twisting, balancing, dodging) and manipulative (throwing, catching, kicking, striking) motor skills. Gross motor development requires thought and deliberate movement. Four-year-old children develop greater control of gross-motor manipulative movements that involve giving force to objects and receiving force from objects.	1. Child demonstrates coordination and balance in isolation (may not yet coordinate consistently with a partner).	a. Child coordinates sequence of movements to perform tasks.	>>>>	>>>>	3	9780076582297 9780076582327 9780076582334 9780076582358 9780076582365	303 159 123 303 187, 211, 223	Moverse y aprender Observar e investigar Whole page Moverse y aprender Lenguaje y vocabulario oral, Lenguaje y vocabulario oral, Lenguaje y vocabulario oral
	B. Fine-Motor Development Skills. Fine-motor manipulative movements involve object-handling activities that emphasize motor control, precision, and accuracy of movement. Using a computer mouse, cutting with scissors, and drawing are the foundational skills needed for the demands of handwriting and other small-motor skills in later school years.	1. Child shows control of tasks that require small-muscle strength and control.	a. X. TECHNOLOGY APPLICATIONS DOMAIN	A. Technology and Devices Skills. Children learn how technology can enhance our lives. Technology includes computers, voice/sound recorders, televisions, digital cameras, personal digital assistants, and MP3 devices or iPODs. Surrounded by technology, children can benefit from becoming aware of and interacting with voice/sound recorders and other technology that may be available. They develop techniques for handling and controlling various devices, becoming increasingly confident and independent users of age-appropriate technologies.	1. Child opens and navigates through software programs designed to enhance development of appropriate concepts.	a.
