Amazing Animals

Growing and Changing

UNIT **6**

Unit 5

Amazing Animals

What is amazing about animals?

giraffe

Animals can be big or small. A giraffe is tall and has four legs. It has a long neck, too.

fish

**A goldfish is small and has no legs.
It can live in a lake or a fishbowl in
your home.**

dog

Pets are animals that live at people's homes. A pet can be a furry kitten, a colorful bird, or a large dog.

rabbit

cat

horse

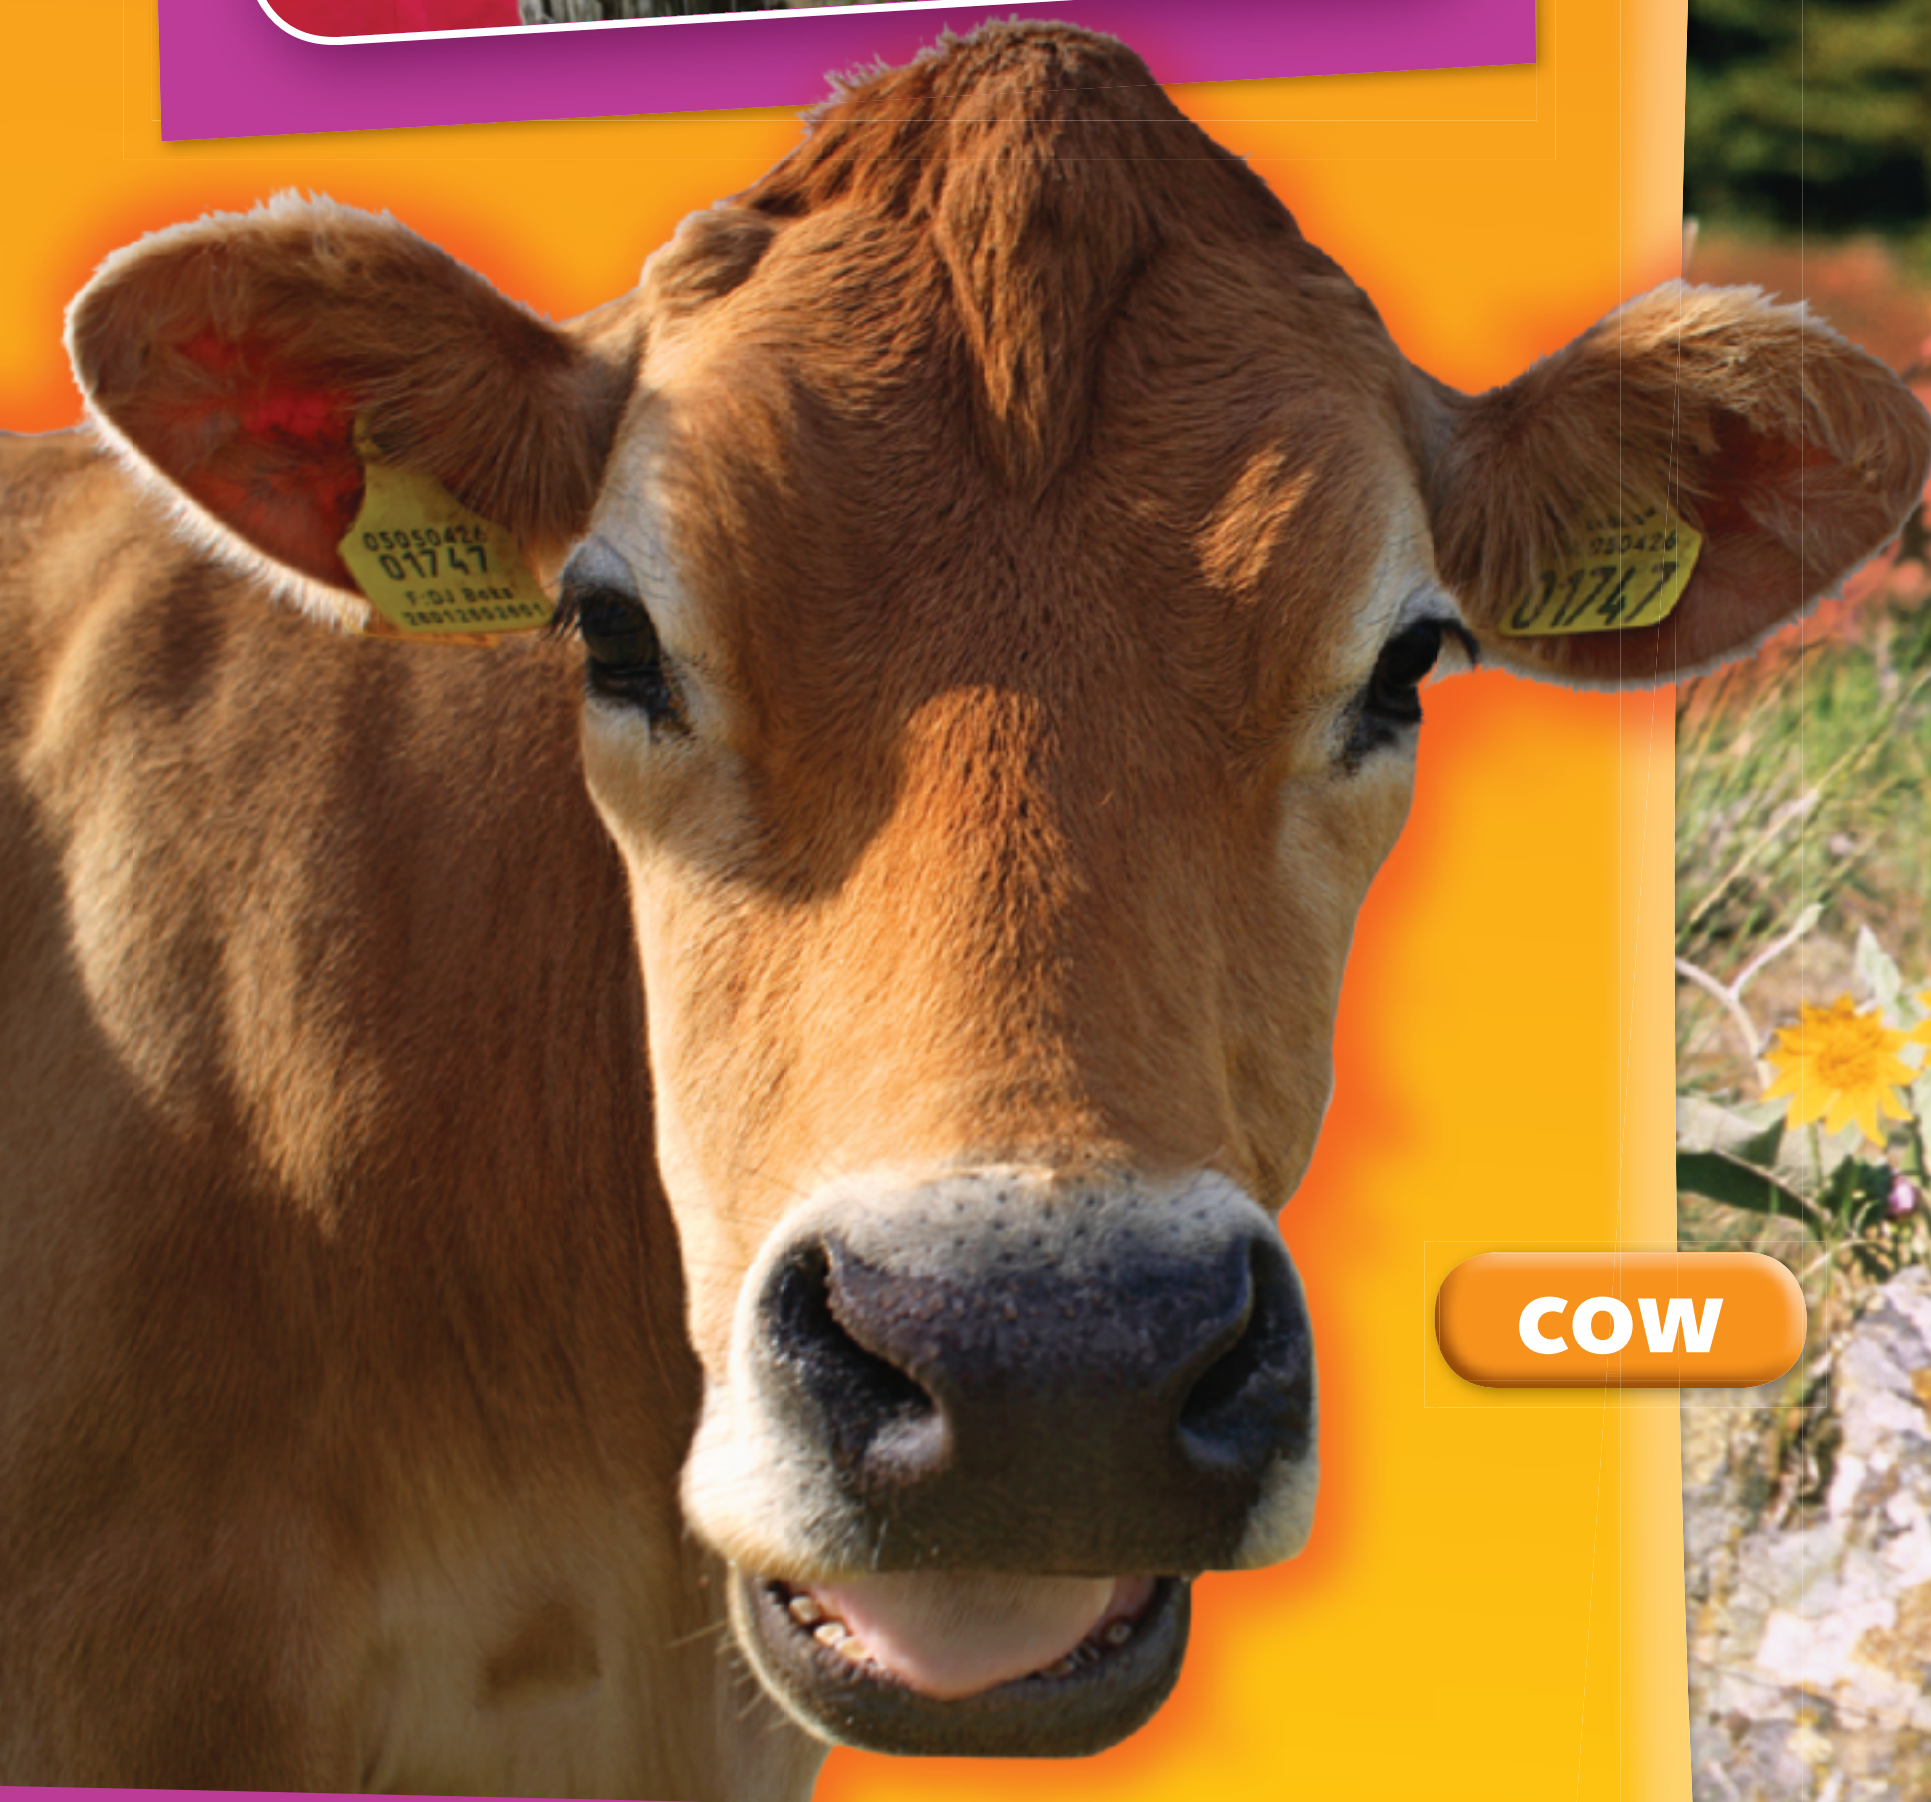

bird

People should feed, love, and care for pets. Do you have a pet? Do you know someone who does?

sheep

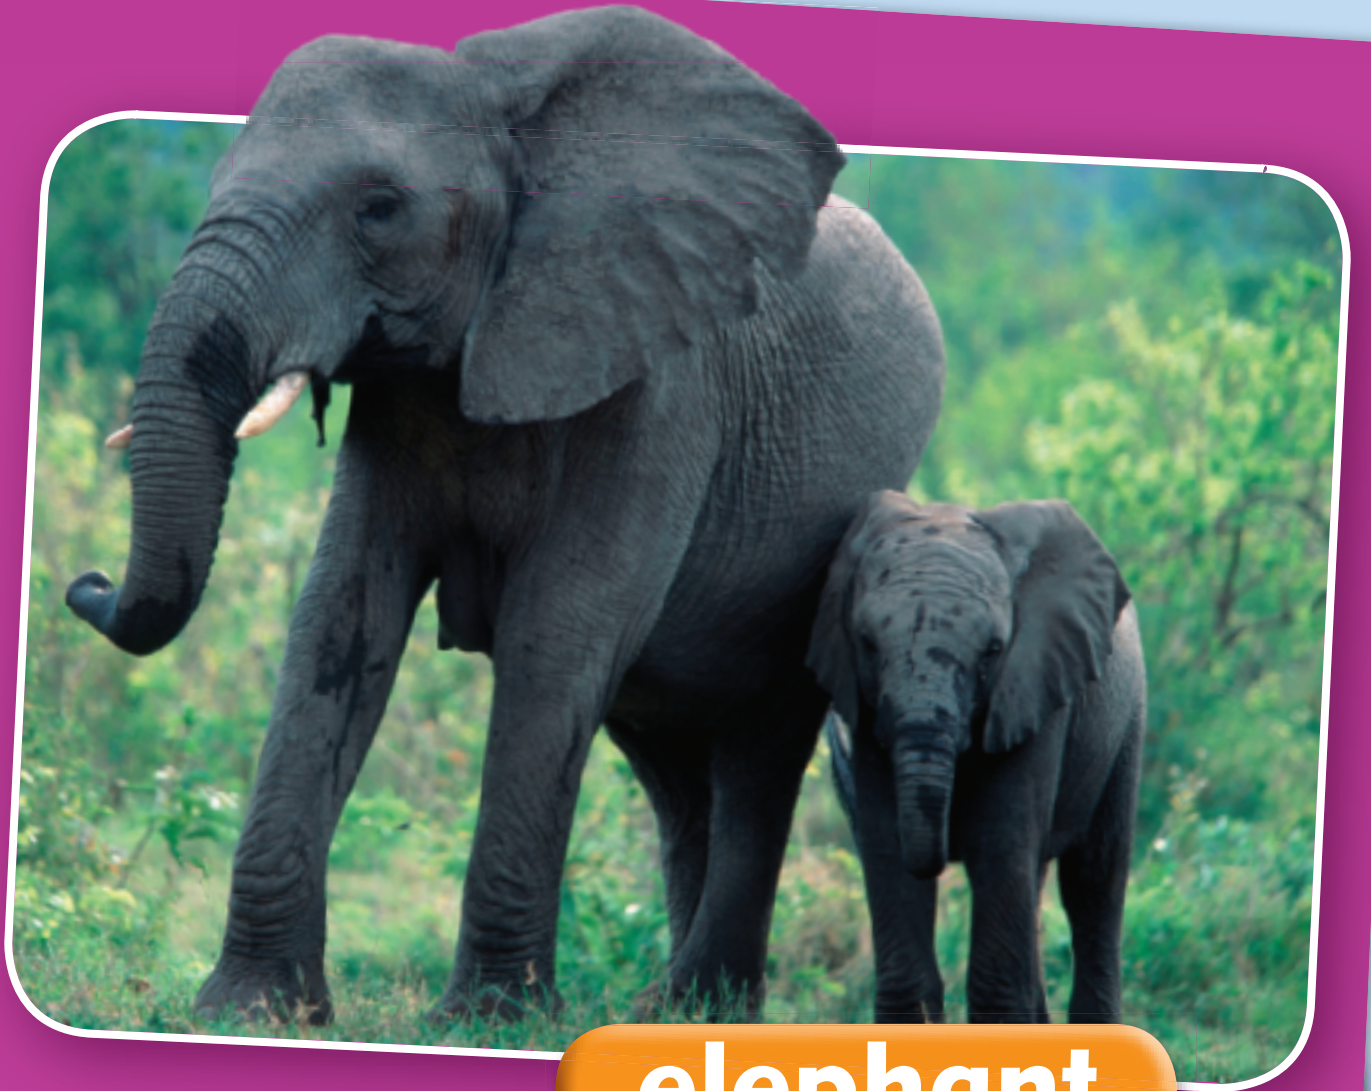

cow

Sheep and cows are **farm** animals.
They need pastures to roam and grass
to eat. They are not pets.

bear

elephant

Bears and elephants live in forests or jungles. They are **wild** animals and need lots of space. Would they make good pets?

rabbit

polar bear

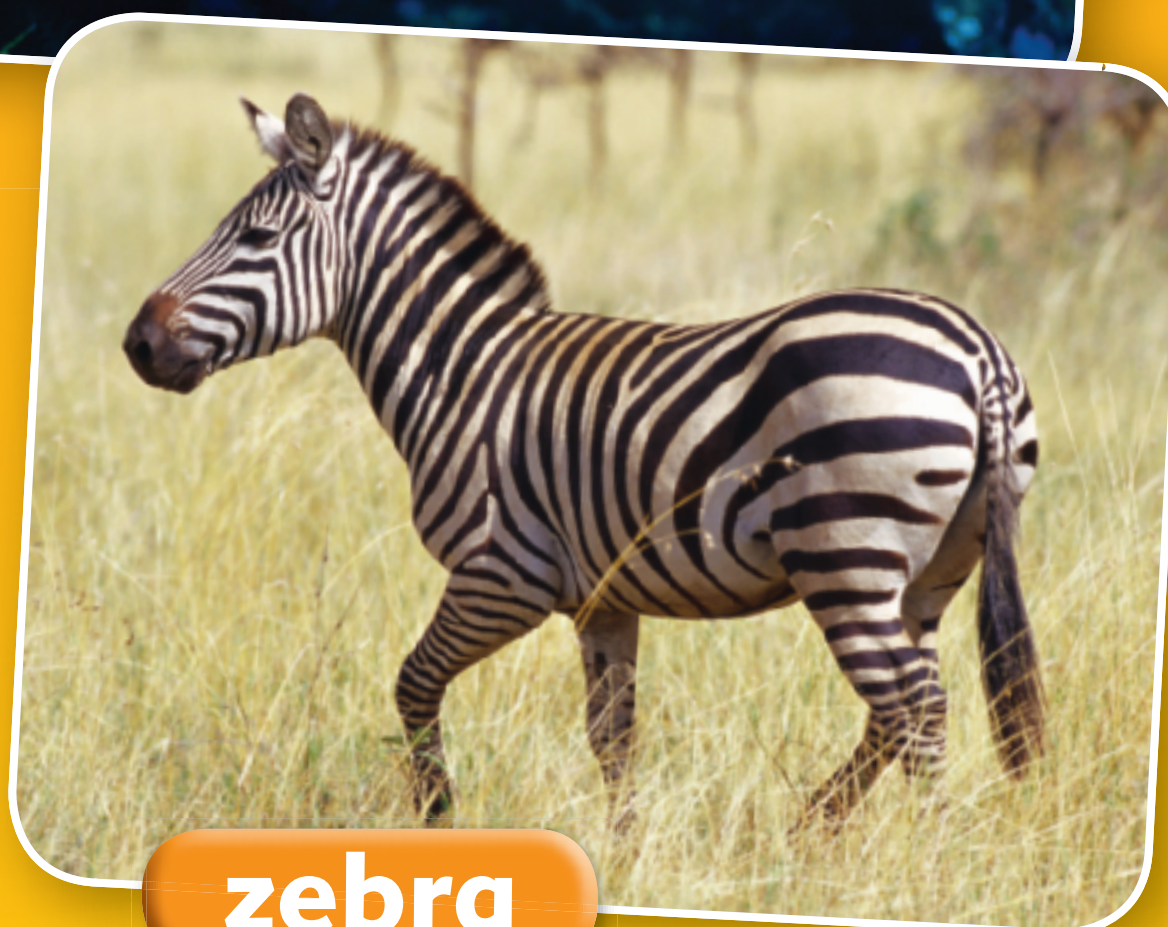

Animals can have a lot in common. Polar bears have white **fur**. Rabbits have fur, too. Which animal has fur with spots?

peacock

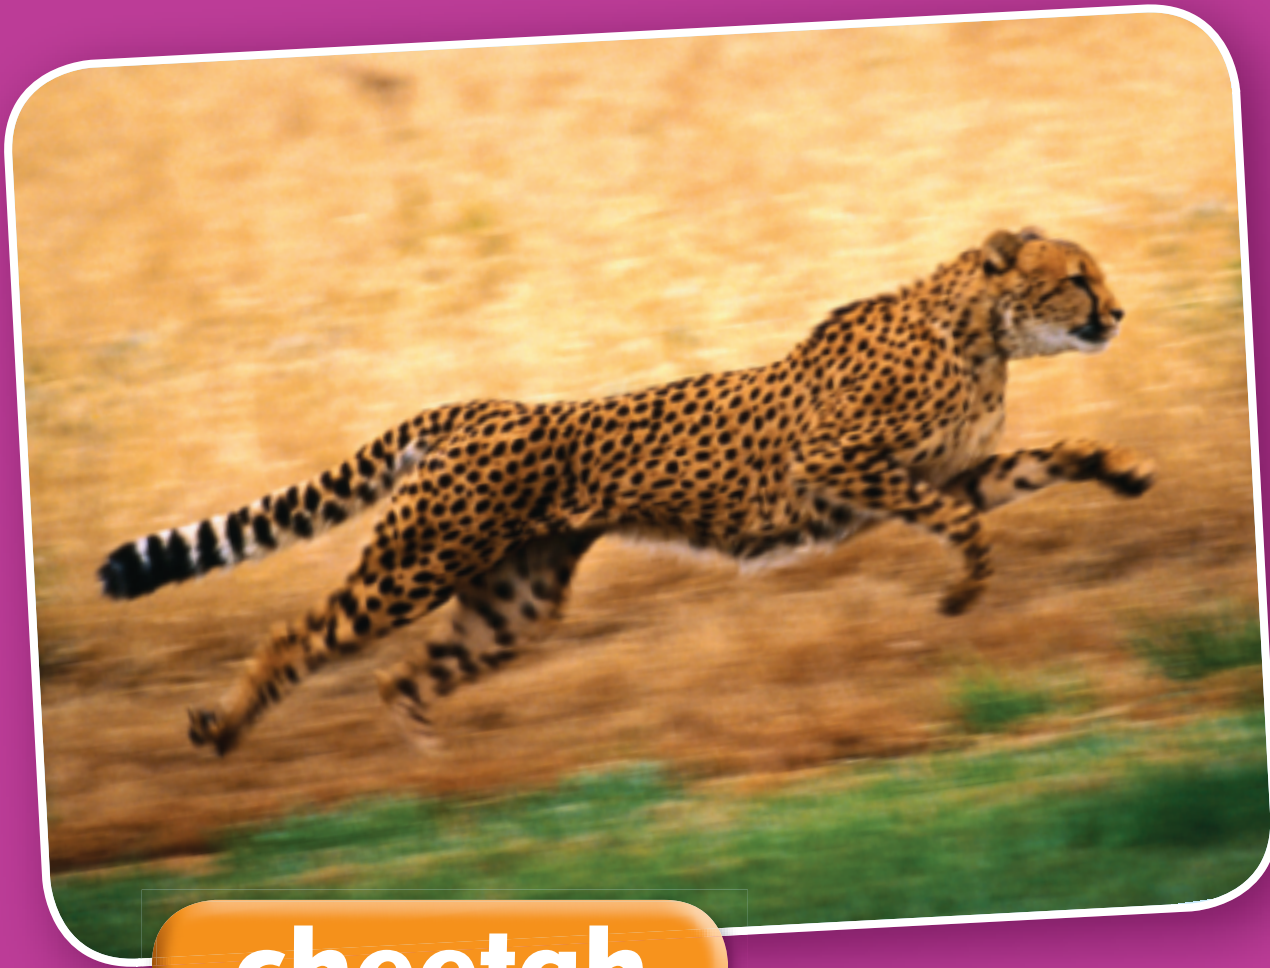

fish

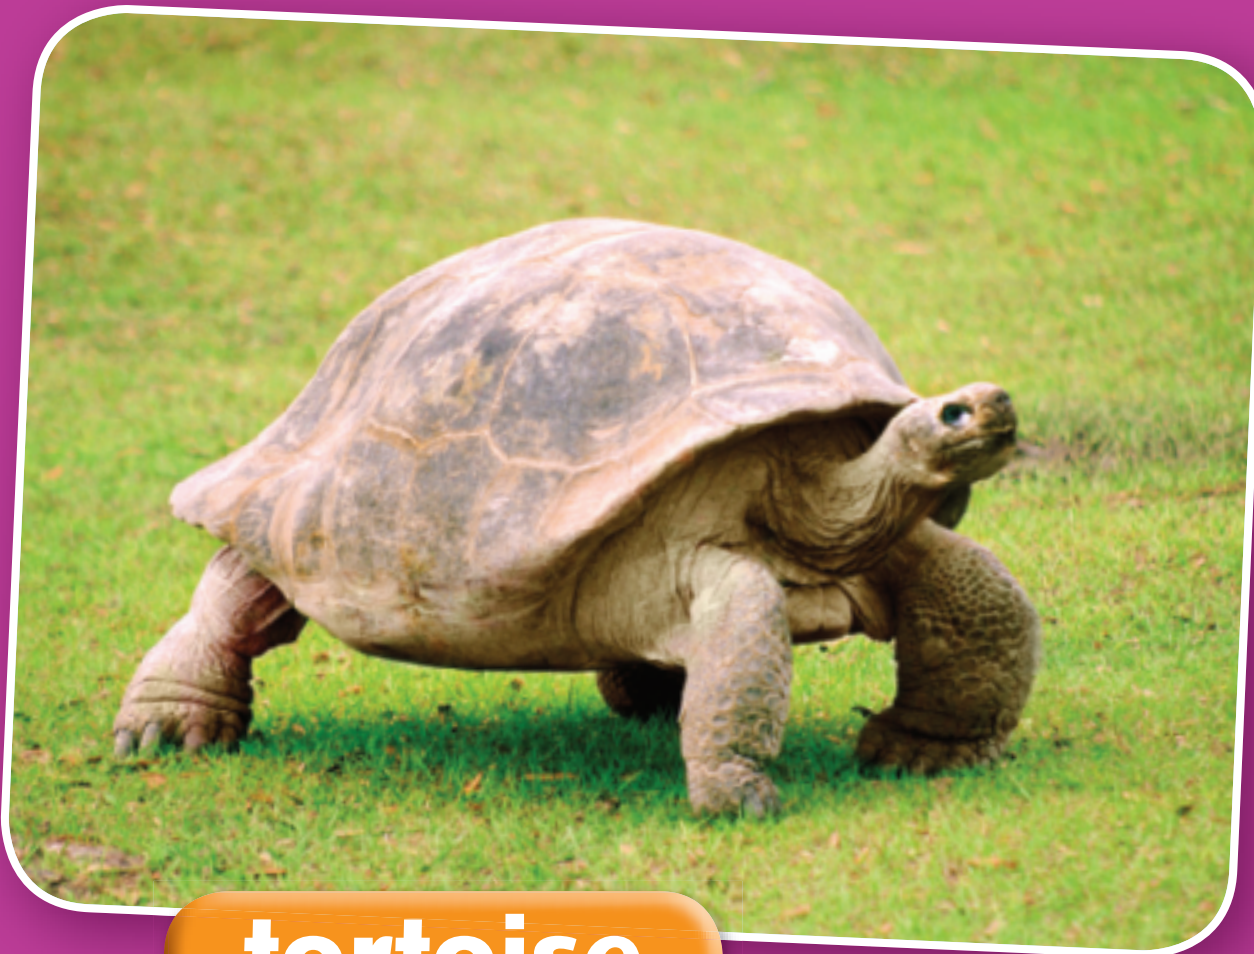

zebra

Animals can also be different.
Peacocks have colorful **feathers**. Fish
have **scales**. Which animal has stripes?

cheetah

tortoise

**Animals can move fast or slow.
A cheetah can move very fast.
A tortoise moves very slowly.**

kangaroo

snake

**Snakes can slither quietly in the grass.
Kangaroos can be loud hopping from place
to place. Can you move like a quiet animal?**

elephant

cat

seal

horse

toucan

frog

What do you know about these amazing animals?
