Take a tour of Imagine It! Technology

Get Started

Insert this disc to see a demonstration of the full spectrum of SRA/McGraw-Hill's *Imagine It!* Technology package.

0000

This demonstration disc requires Windows 2000, Windows XP, or Mac OS X.

Explore a new world of teaching with today's most advanced classroom technology

The components of the *Imagine It!* technology package:

- Enhance instruction
- Provide advanced ways to organize, prepare, and teach lessons
- Offer opportunities to enrich learning and interaction with students

Explore classroom technology that's out of this world!

With so many technology options integrated in the *Imagine It1* reading and language arts program, you'll find more ways than ever to reduce prep time, enhance your planning and teaching, and most importantly, engage your students in learning!

Imagine It! Technology Sampler Introductory Screen

Save preparation and organization time

For the Teacher

Use this interactive planner to create and print yearly, monthly, and daily lesson plans. This time-saving tool reduces preparation and planning by giving you smart, intuitive features, including prepopulated lessons and links to Blackline Masters.

The dynamic online version of **ePlanner** contains an even richer technology toolbox:

- Allows you to plan lessons from anywhere
- Offers a Lesson Search based on state standard, topic, keyword, or lesson number
- Includes an export function to print or e-mail your lessons to others
- Includes a high-level correlation to each state's standards
- Shows objectives/materials/vocabulary for each day's instruction
- Allows you to shift all lesson plans automatically due to holidays, snow days, etc.

benefits for teachers!

Need to prepare for a substitute

teacher? The online version of ePlanner allows you to plan and access lessons from home.

Use the Notes field to leave tips and information for the substitute for each planning day—all without ever leaving your home!

Provide background knowledge with engaging videos

For the Teacher

eBackground Builders offer a wonderful resource to enhance instruction with real images and video clips based on each unit's theme. Use the videos to provide background information about the unit theme and prepare students for the concepts they are about to learn.

eTeacher's Edition

Grades Pre-K-6 • Available Online and on CD-ROM

Speed up preparation and save time on every lesson

For the Teacher

The **eTeacher's Edition** makes planning, preparing, and reviewing lessons easier and faster than ever before. The convenient electronic format allows you to access the entire **Teacher's Edition** with built-in, powerful convenience tools.

- An Electronic Table of Contents makes it easy to quickly find and select the lesson you want to teach
- The Notes feature allows you to make and store notes with each lesson
- A Highlight tool lets you isolate specific areas on each page

benefits for teachers!

Need to prepare for lessons from home? The online version of the **eTeacher's Edition** is accessible from home so you can review and prepare for upcoming lessons—you can even make and save notes online!

Simple, intuitive navigation buttons make it easy to explore the **eTeacher's Edition**, view pages or spreads, and zoom in or out

benefits for teachers!

each student?

For the Teacher

Quickly build tests and monitor student progress

Looking for ways to differentiate assessment for

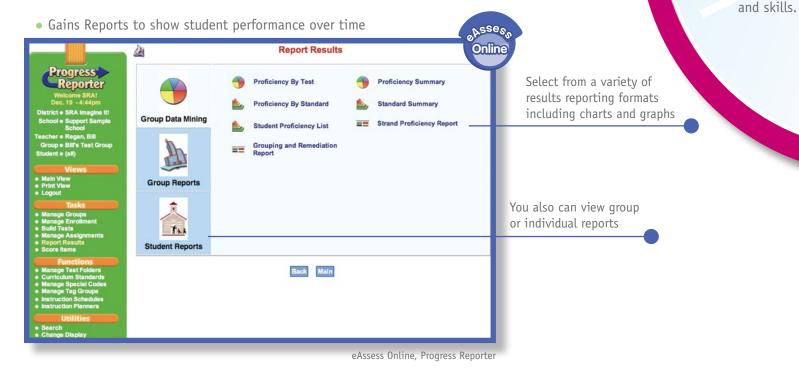

With **eAssess** you can customize any assessment for the entire classroom or for individual students

to test them on specific areas, concepts,

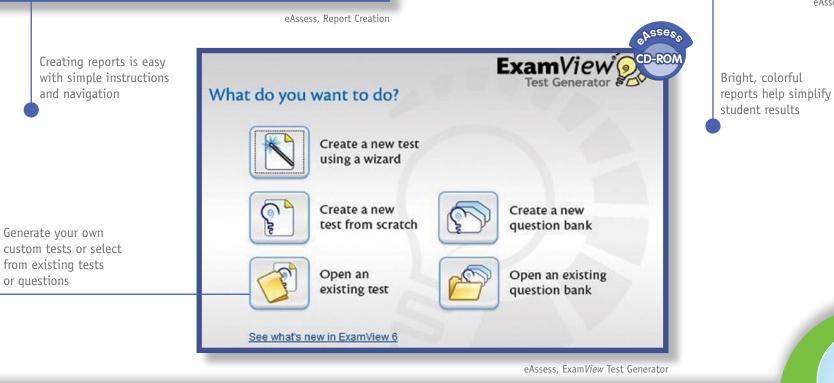

With **eAssess**, you'll have the flexibility and speed to generate customized tests that are quickly and automatically scored and stored! You'll save time by using or modifying existing question banks, and a variety of automatic reports that help track student progress and offer effective remediation suggestions.

eAssess offers you advanced features, including:

- Report generating for individual students or an entire classroom
- Ability to review how students perform by indicating the grading scale and reviewing how students do by standard, question, etc.
- State-specific test formats
- Grouping and Remediation Reports to inform you how to structure classroom groups

rignment Results by Class CD-ROM		
This report shows you how your students performed on a particular assignment. The report includes the student's name, ID, points earned, and percentage. A separate page provides	Students

eStudent Reader

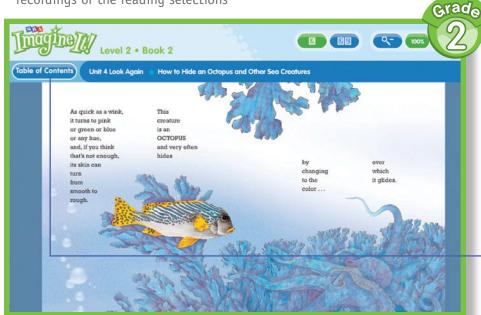

Grades 1–6 • Available Online and on CD-ROM

For the Teacher

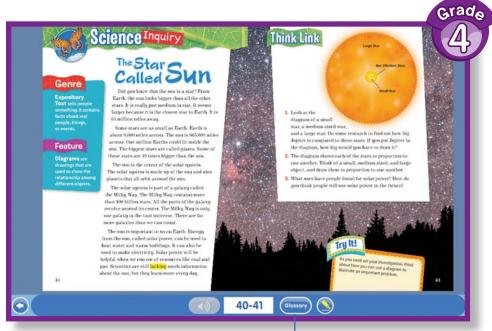

Engage students with interactive lessons

Now you can bring the lessons within *Imagine It!* to life for your students through a dynamic **eStudent Reader**. Using Flash-based software, you and your students will be able to review large-screen projections of the **Student Reader** content in an interactive format. It combines exciting visuals, interactivity, and audio content to make each lesson entertaining as well as educational.

- An Electronic Table of Contents makes it easy to quickly find and select the lesson you want to teach
- The Zoom tool allows you to focus attention and review specific content
- Vocabulary words can be isolated using the Highlight tool and defined using the Glossary tool
- Audible reading selections on each page allow the entire classroom to hear recordings of the reading selections

eStudent Reader, Grade 2

eStudent Reader, Grade 1

Simply click on any lesson within the Table of Contents to go directly to the lesson

Return to the Table of Contents from any lesson at any time

All glossary or vocabulary words within each reading selection are linked to an audio file for quick and easy review to enhance teaching on the go.

The next dates was even letter than the first, it was performed to the constant let of each main. So in two were the distorted that the dwallbar second in the conting from their lodg maternation. eSkills & eGames

Grades Pre-K-6 • Available Online and on CD-ROM

Start students learning with fun practice

For the Student

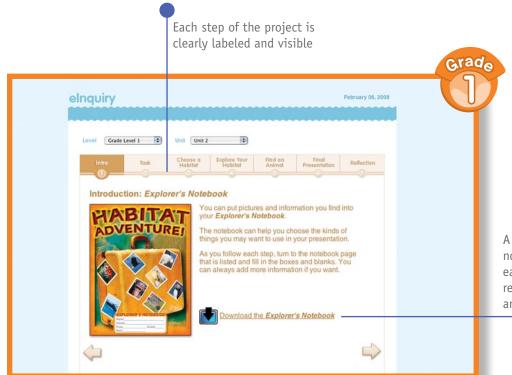

Grades 1-6 • Available Online Only

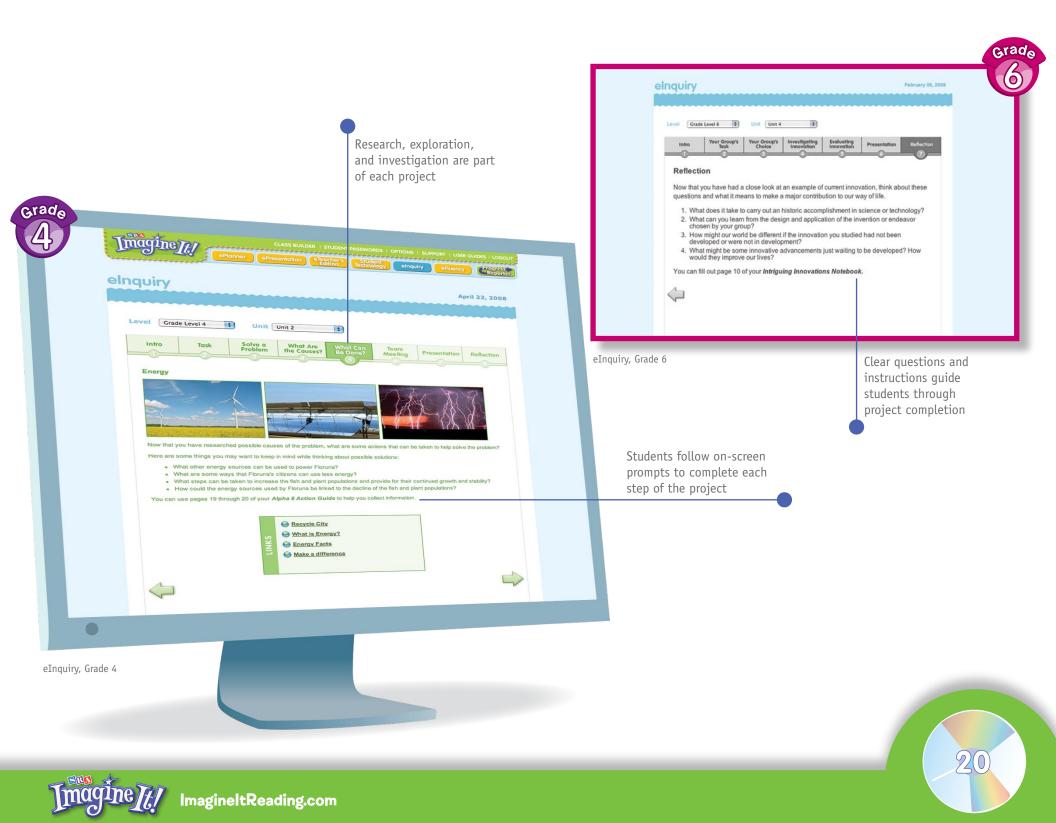

Challenge students with higher-order thinking

The activities within **eInquiry** challenge students to enhance their creative and critical thinking skills while learning how to find answers to their own questions.

- Each activity contains a themed project for students to complete individually or in small groups
- Web links within the **eInquiry** activities are used to gather information
- Students record their findings and notes in a PDF notebook throughout the project
- Students report results as presentations to the class in a variety of formats

eInquiry, Grade 1

For the Student

Denefits for teachers!

The varied and engaging topics of the **eInquiry** projects give students important cross-curricular exposure in subject areas such as science, social studies, and more!

A PDF version of a project notebook is provided with each project for students to record their notes, questions, and answers

Monitor fluency with fast results

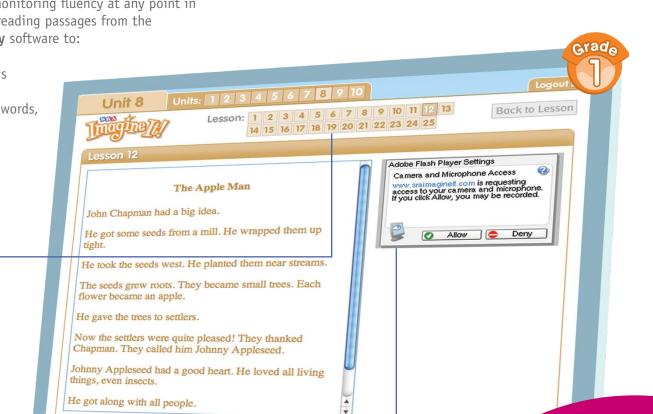

For the Student

eFluency gives you an exceptional tool for monitoring fluency at any point in instruction. Students will record themselves reading passages from the Fluency Readers; then you'll use the **eFluency** software to:

- Listen to individual students' audio recordings
- Review data on words read per minute, total words, and words recorded

Students follow simple instructions to record themselves

eFluency, Grade 1

Looking for additional ways to save

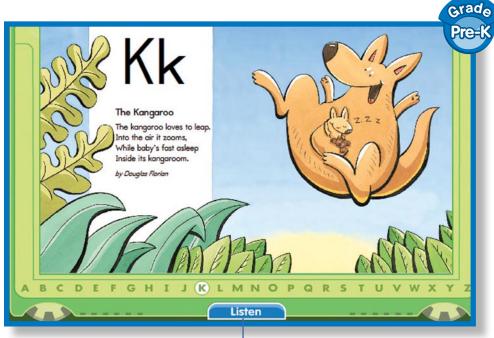

eAlphabet Book

Grades K • Available Online and on CD-ROM

Keep students learning with fun practice

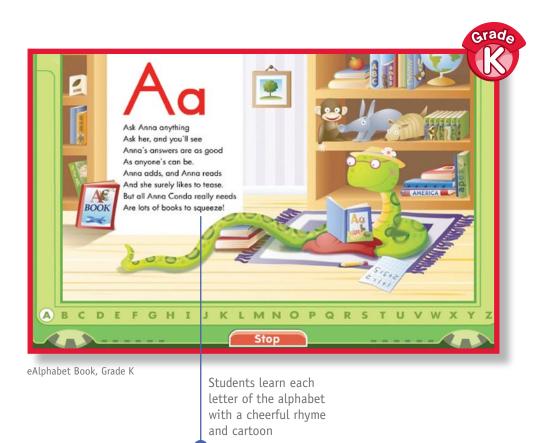

For the Student

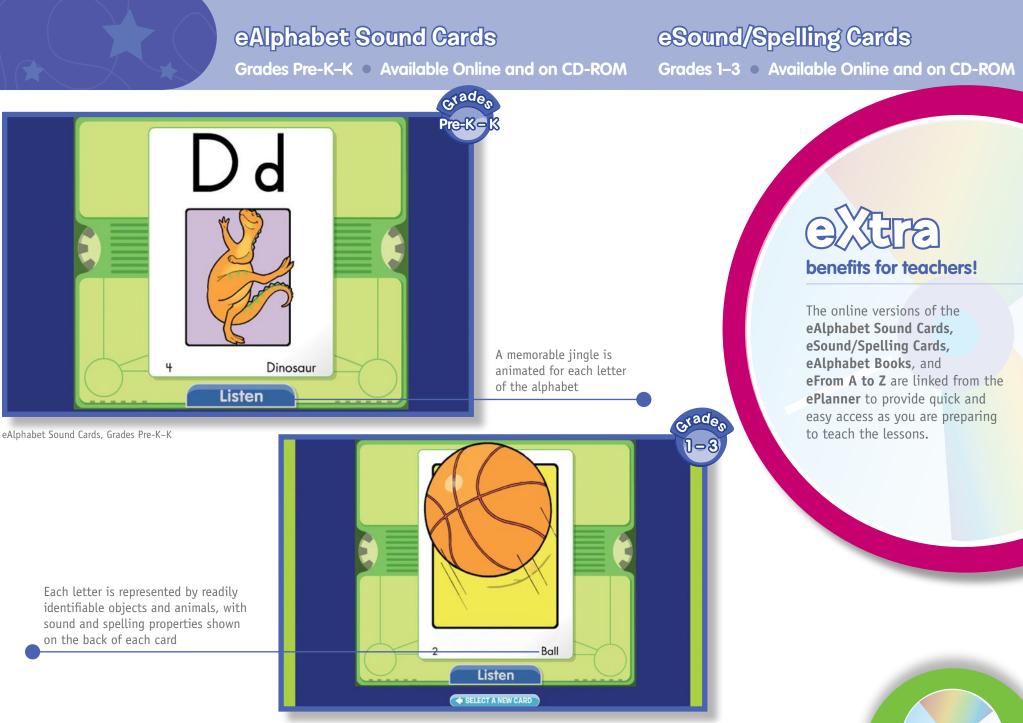

Give students valuable opportunities to practice key spelling, letter, and sound skills on their own. Each program translates the print cards into a fun, interactive experience using animation, music, and audio recordings of the stories and jingles.

eFrom A to Z, Grade Pre-K

This interactive version of the Big Book delights children with charming songs and animations
