

6

Missing Addends

Here's How

Remember:

Addends are the numbers being added together.

- ▶ Use the addition facts you know to help find the **missing addend**.

$$4 + \square = 10$$

Say: 4 plus what number equals 10.

You know that $4 + 6 = 10$.

If $4 + 6 = 10$, then the missing addend is 6.

Try These

Use the addition facts you know to help you.

Find each missing addend.

- | | |
|------------------------|------------------------|
| ▶ 1. $4 + \square = 8$ | 2. $6 + \square = 15$ |
| 3. $4 + \square = 9$ | 4. $5 + \square = 8$ |
| 5. $9 + \square = 9$ | 6. $3 + \square = 11$ |
| 7. $7 + \square = 13$ | 8. $3 + \square = 12$ |
| 9. $2 + \square = 11$ | 10. $5 + \square = 7$ |
| 11. $9 + \square = 18$ | 12. $8 + \square = 16$ |

Go Ahead

Think about the addition facts you already know.

Find each missing addend.

▶ 1. $9 + \square = 14$

2. $2 + \square = 9$

3. $8 + \square = 17$

4. $1 + \square = 4$

5. $7 + \square = 16$

6. $5 + \square = 13$

7. $6 + \square = 13$

8. $7 + \square = 14$

9. $9 + \square = 17$

10. $8 + \square = 13$

11. $5 + \square = 14$

12. $3 + \square = 10$

13. $6 + \square = 12$

14. $6 + \square = 10$

15. $5 + \square = 11$

16. $4 + \square = 9$

17. Darren needs to set the table with 12 plates. He carried seven to the table. How many more does he need?
