

To the Student	xvii
--------------------------	------

UNIT 1 Interpreting Categorical Data

Lesson 1 Comparing the Risk	2
Investigations	
1 Summarizing and Displaying the Risk.	3
2 Comparing Risk.	9
3 Design of Experiments.	13
On Your Own	19
Lesson 2 A Test of Significance	36
Investigations	
1 Homogeneous Groups.	37
2 The Chi-Square Statistic	42
3 Statistical Significance.	47
On Your Own	54
Lesson 3 The Relationship Between Two Variables	70
Investigations	
1 Diagnostic Testing	71
2 Independence	76
3 The Chi-Square Test of Independence	81
On Your Own	85
Lesson 4 Looking Back	99

UNIT 2 Functions Modeling Change

Lesson 1 Function Models Revisited	104
Investigations	
1 Modeling Atmospheric Change	106
2 Modeling Change in Business Prospects	112
3 Modeling Periodic Change.	117
4 Function Families.	122
On Your Own	126
Lesson 2 Customizing Models by Translation and Reflection	144
Investigations	
1 Vertical Translation	145
2 Reflection Across the x -Axis	150
3 Horizontal Translation	154
On Your Own	159

Lesson 3 Customizing Models by Stretching and Compressing 170

Investigations

 1 Vertical Stretching and Compressing 171

 2 Horizontal Stretching and Compressing 178

On Your Own 183

Lesson 4 Looking Back 195

UNIT 3 Counting Methods

Lesson 1 Systematic Counting 202

Investigations

 1 Methods of Counting 204

 2 Principles of Counting 208

On Your Own 212

Lesson 2 Order and Repetition 220

Investigations

 1 Permutations and Combinations 221

 2 Collections, Sequences, This or That 228

On Your Own 232

Lesson 3 Counting Throughout Mathematics 241

Investigations

 1 Counting and Probability 242

 2 Combinations, the Binomial Theorem, and Pascal's Triangle 247

On Your Own 252

Lesson 4 Looking Back 261

UNIT 4 Mathematics of Financial Decision-Making

Lesson 1 Financial Decision-Making: Saving 266

Investigations

 1 Simple-Interest Investments 267

 2 Compound-Interest Investments 272

 3 Investment Strategies and Tools 276

 4 Compound Interest and the Number e 283

On Your Own 287

CONTENTS

Lesson 2 Financial Decision-Making: Borrowing	302
Investigations	
1 Credit Card Options	303
2 Borrowing and Lending	310
3 Purchasing vs. Leasing	316
On Your Own	320
Lesson 3 Looking Back	334

UNIT 5 Binomial Distributions and Statistical Inference

Lesson 1 Binomial Distributions	340
Investigations	
1 Rules of Probability and Binomial Situations	341
2 The Binomial Probability Formula	347
3 Statistical Significance	354
On Your Own	360
Lesson 2 Sample Surveys	375
Investigations	
1 Trustworthy Surveys	376
2 How Surveys Can Go Wrong	380
On Your Own	387
Lesson 3 Margin of Error: From Sample to Population	399
Investigations	
1 Variability from Sample to Sample	400
2 The Margin of Error.	406
3 Interpreting a Confidence Interval.	410
On Your Own	414
Lesson 4 Looking Back	426

UNIT 6 Informatics

Lesson 1 Access: Set Theory, Logic, and Searching	430
Investigations	
1 Intersection, Union, and Set Difference	431
2 Subsets and Complements	441
On Your Own	445

Lesson 2 Security: Cryptography	455
Investigations	
1 Symmetric-Key Cryptography	457
2 Modular Arithmetic	461
3 Public-Key Cryptography	467
On Your Own	475
Lesson 3 Accuracy: Error-Detecting and -Correcting Codes	484
Investigations	
1 ID Numbers and Error-Detecting Codes	485
2 Transmit Information Using Error-Correcting Codes	492
On Your Own	499
Lesson 4 Efficiency: Data Compression	508
Investigation	
1 Huffman Codes	509
On Your Own	517
Lesson 5 Looking Back	522

UNIT 7 Spatial Visualization and Representations

Lesson 1 Representing Three-Dimensional Objects	528
Investigations	
1 Using Data to Determine Surfaces	529
2 Visualizing and Reasoning with Cross Sections	535
On Your Own	540
Lesson 2 A Three-Dimensional Coordinate System	551
Investigations	
1 Relations Among Points in Three-Dimensional Space	552
2 The Graph of $Ax + By + Cz = D$	558
3 Systems of Equations	561
On Your Own	566
Lesson 3 Linear Programming: A Graphical Approach	576
Investigations	
1 Linear Programming with Two Variables	577
2 Linear Programming with Three Variables	582
3 Linear Programming using Spreadsheets	585
On Your Own	591
Lesson 4 Looking Back	601

UNIT 8 Mathematics of Democratic Decision-Making

Lesson 1 Social Choice and Voting 606

Investigations

 1 Ranked-Choice Voting 607

 2 Fair Is Fair, Isn't It? 616

 3 Weighted Voting and Voting Power 620

On Your Own 624

Lesson 2 Fair Division 642

Investigations

 1 Political Apportionment 643

 2 Getting Your Fair Share 652

On Your Own 662

Lesson 3 Looking Back 673

Glossary 676

Index of Mathematical Topics 700

Index of Contexts 704
