WORKFORCE
access 

Suggested Course
Pathways

Workforce Access builds academic and technical skills in the context of high-growth career clusters. These are the skills that open doors—first to credentials and certifications and then to employability in family-sustaining careers.

This online program includes:

- Bridge courses based on the Integrated Basic Education and Skills Training (I-BEST) model, which combines basic skills with industry-specific technical competency instruction
- A soft-skills course for developing the interpersonal skills critical for success in any workplace
- A basic math course that prepares learners for higher-level training, postsecondary education, or entry-level careers

Whether they're training for a first career or re-training for a new one, learners need course pathways that make sense for them. With *Workforce Access*, you can customize training plans for every learner in your center.

See our suggested course pathways to get started today.
